I. Methodology, Scope, and Limitations

This is a preliminary structured report based on publicly accessible summary pages, index pages, and selected self-published source documents associated with the Barran Dodger archive. It does not constitute an analysis of the actual 2,304 exhibit files themselves. The archive's full exhibit manifest, individual SHA-256 hashes, chain-of-custody records, and forensic AI methodology were not independently accessed or audited for this report.

Sources Reviewed

barrandodger.com, economic-justice-engine.replit.app, barrandodger.com.au, Medium (10+ articles), Scribd (6+ documents), and Apple Books (2+ publications). These sources represent the archive's public-facing summaries, named-parties directories, and selected primary documents rather than the complete exhibit collection.

Key Limitations

- All claims are presented as allegations made by the archive author (Dr. Richard William McLean / Barran Dodger). They have not been independently verified.
- The archive's technical verification claims (SHA-256 sealing, blockchain timestamping, forensic AI analyses) are reported as stated by the archive and have not been independently audited.
- No claim in this report has been confirmed by judicial finding, criminal conviction, or institutional investigation as of the date of this report.
- Throughout this report, phrases such as "the archive states," "the archive alleges," or "allegedly" signal that the information originates from the archive's self-published materials.

II. Executive Summary

This report analyses the public-facing materials of the Barran Dodger archive — a collection that the archive states contains 2,304 SHA-256 sealed exhibits, maintained by Dr. Richard William McLean, who publishes and operates under the pseudonym "Barran Dodger." The archive, hosted across barrandodger.com, economic-justice-engine.replit.app, Medium, Scribd, and Apple Books, purports to document 35 years of systemic persecution by 35+ Australian government agencies and named individuals. The archive states that its collection includes 788 freely distributed PDFs, 891 Bitcoin blockchain timestamps, 73 independent forensic AI analyses (assessing 603 propositions across 55 reviews with what the archive reports as zero contradictions), and over 502,000 verified downloads across six continents. All claims documented below are allegations presented by the archive author. No court has entered a final judgment or criminal conviction against any named party in connection with these allegations.

III. Archive Structure and Verification Methods

Technical Infrastructure (as stated by the archive)

Component	Description (per archive)
2,304 SHA-256 sealed exhibits	Each exhibit sealed with a SHA-256 hash. Final consolidated hash: f7a8810b32f731e4f7be1220cb15b8a47be4a68e85dce204998c766b7304d90b

Component	Description (per archive)
891 Bitcoin blockchain timestamps	Documents timestamped on the Bitcoin blockchain, described as permanent and irrevocable
788 freely distributed PDFs	Publicly accessible evidence documents
73 forensic AI analyses	"Universal Forensic Command" methodology; 575 corroborated propositions / 575 attempts across 53 analyses, 46 consecutive perfect scores
502,000+ verified downloads	Distribution across six continents; zero marketing budget

Limitations of Verification Claims (not independently audited)

The archive does not publicly provide: individual SHA-256 hashes for each exhibit; chain-of-custody procedures; identities or qualifications of forensic AI analysts; methodology for the AI analyses; Bitcoin transaction IDs; or whether exhibits have been independently audited.

Aggregate provable liability	\$58.6M–\$257.3M	Multiple frameworks

VII. Summary of Claim Areas

A. Financial Sabotage

The archive alleges a coordinated campaign of economic destruction spanning 35 years, operating through multiple mechanisms:

1. **Employment Denial:** 35 years of alleged APS employment denial, confirmed in writing by Federal Court General Counsel Scott Tredwell on 27 March 2023. The "Chronic Schizophrenia" diagnosis allegedly functioned as a barrier to security clearances and professional registration. Cited economic impact: \$4.09M–\$28M.
2. **Financial Guardianship Control:** NSW Trustee and Guardian held financial guardianship for 12+ years through officer Phillip Glass. Alleged conduct includes ignoring crisis calls, withholding funds, charging management fees, and making property decisions without knowledge. Cited: Guardianship Act 1987 (NSW), Crimes Act 1900 (NSW) s.192E, UNCAT Art 16.
3. **NDIS Fund Withholding:** Sukhi Tear allegedly sat on \$48,000 in approved Core Supports while McLean was homeless. NDIS payments allegedly frozen despite approved plans. Total denied settlements alleged at \$2.2 million (\$1.1M WorkCover + \$300,000 medical malpractice).
4. **Business Destruction:** Micron21 allegedly destroyed McLean's IT consulting business, including goodwill, client base, and data. Valued at \$1.35M–\$4.1M.
5. **NDIS Embezzlement:** Sukhi Tear allegedly embezzled \$50,000 in NDIS funds. Police Report PD77027 associated with five missing-person registrations. Damages: \$112,422–\$262,422.
6. **Suppressed Economic Claim:** A \$112.8 million claim allegedly suppressed because a mental-health-history strategy caused McLean to be treated as a mental-health case rather than a protected disclosure holder.

B. Psychiatric Weaponization

The archive alleges the systematic misuse of psychiatric diagnosis, involuntary hospitalisation, and mental health labelling as instruments of silencing and control:

1. **Involuntary Hospitalisations:** 14 involuntary psychiatric hospitalisations across NSW, Victoria, and Queensland. Described as ICC Art 7(1)(h) exhibits for persecution as a crime against humanity.
2. **Diagnostic Label as Economic Weapon:** The schizophrenia diagnosis allegedly functioned as an "economic eraser," affecting security clearances, creditworthiness, and social capital. ABS cited:

individuals with psychiatric histories earn 38%–62% less.

3. NDIS Mental Health Strategy: A strategy allegedly coordinated through "Ben from NDIS Help" under the Office of the Minister for NDIS, weaponising McLean's mental-health history to suppress whistleblower testimony. Linked to PID Act 2013 s.10 and ICCPR Art 19(2).

4. V2K Technology Claims: McLean alleges subjection to Voice-to-Skull (V2K) technology, described as "covert auditory torture using directed energy weapons." The archive cites declassified government documents and patents. No independent verification of V2K deployment is provided.

5. Clinical Death Event (2021): In early 2021, McLean allegedly experienced a clinical death event inside Werribee Mercy Hospital. Stated survival margin: 2.87%. Characterised as "attempted murder by institutional negligence at minimum." Valued at \$4.9M–\$7.6M.

C. Assassination Attempts and Death Threats

1. Clinical Death Event: The 2021 Werribee Mercy Hospital event is characterised as an attempted assassination through institutional negligence. No specific individual is identified as the perpetrator.

2. Tory Kilbourne Death Threat: Kilbourne allegedly issued a recorded death threat. Submitted to Wyong Local Court (Receipt I88267509), hearing listed 14 May 2026. Filed with ICC under Art 7(1)(h). AFP non-response documented as exhibit.

3. Alleged Contracted Killers: McLean alleges that his NDIS provider reported that "two contracted killers were arrested." No identities, dates, charges, or police report numbers are provided.

4. Tony Ridley Threats: Ridley allegedly stated: "We've thought of everything" and "You're going to die, Richard." Allegedly tracked McLean using GPS and followed him interstate.

5. Five Missing-Person Registrations: McLean was reported missing five times across NSW, Victoria, and Queensland (Police Report PD77027).

XI. Key Observations

Claims Not Independently Verified

The archive presents extensive allegations but does not provide evidence of:

- Any criminal conviction, court judgment, or formal judicial finding against any named party
- Any ICC, OHCHR, or UNHCR response confirming investigation or acceptance
- Any independent audit of the 2,304 SHA-256 sealed exhibits or forensic AI methodology
- Any confirmation of Tony Ridley's military or intelligence affiliation
- Any confirmation of Steve Iasonidis's ASIO employment
- Any police confirmation of the "two contracted killers" arrest allegation
- Any formal NDIS Commission finding against Sukhi Tear or AblePoint Australia

Structural Patterns in the Archive

1. Self-published across multiple platforms: barrandodger.com, barrandodger.com.au, economic-justice-engine.replit.app, Medium (10+ articles), Scribd (6+ documents), Apple Books (2+ publications)
2. Blended formats: The archive combines primary-source documents (hospital records, FOI retrievals, court filings) with creative/literary works (satirical confessions, gospel-style texts, prophetic declarations) and economic valuations
3. Absence of defamation proceedings: The archive states that no named party has initiated defamation proceedings or produced a factual rebuttal

4. Agency non-responses as evidence: The archive systematically characterises each government agency's failure to respond as "itself a primary source exhibit"

5. Economic quantification: The archive applies formal valuation frameworks (OBPR, EBITDA multiples, comparable case law) to produce aggregate liability estimates of \$58.6M–\$257.3M
