I AM ALIVE. I AM WELL. I AM SAFE. I AM PROTESTING.

Formal statement by Dr Richard William McLean — Barran Dodger

To: NSW Police, Mental Health Crisis Teams, Treating Clinicians, Hospital Personnel, NDIS Safeguarding Authorities and Relevant Oversight Bodies.

I wish to make the following statement clearly and formally.

1. MY CURRENT WELLBEING

I am alive. I am well. I am eating. I have sufficient food. I am taking my prescribed medication.

I am not making this statement because I am asking for psychiatric intervention. I am making it because I want my present circumstances and my intentions to be understood accurately.

I am capable of expressing my concerns, communicating my position, documenting my experiences and advocating for myself.

I am not asking to be rescued from my own thoughts or silenced because I have made complaints against an organisation.

2. THE PROBLEM I AM PROTESTING

My principal concern is Able Point and what I believe are serious failures of accountability, transparency, safeguarding and service delivery.

I allege that there have been unacceptable failures in the way my concerns have been handled and that matters requiring independent investigation have not received an adequate response.

I am protesting what I believe to be corruption, institutional misconduct and failures of accountability.

These are complaints that I want investigated on their evidence.

I want the relevant records preserved, the people responsible for decisions identified, and the organisation's conduct independently examined.

I do not accept that raising complaints about a disability-support provider should, in itself, be treated as evidence that I am mentally unwell or incapable of making decisions.

3. MY RIGHT TO PROTEST AND COMPLAIN

I have the right to express dissatisfaction with my accommodation, support arrangements and the conduct of organisations responsible for providing services to me.

I have the right to report suspected misconduct, request investigations, seek independent advocacy and demand accountability.

I have spent considerable time preserving documentary evidence and recording my experiences.

My public archive is available at:

https://github.com/wezzo72/Barrandodger

I invite appropriate authorities to examine the documentary record rather than make assumptions about me based on the fact that I am protesting.

4. A REQUEST TO POLICE

If police attend or receive a report concerning me, I ask that officers:

- Record that I have expressly stated that I am alive and well.
- Record that I have sufficient food and am taking my prescribed medication.
- Ask me directly whether I have any immediate safety concerns or require assistance.
- Distinguish my complaints about Able Point from any separate mental-health assessment.
- Record my allegations accurately and distinguish my testimony from independently established facts.
- Provide an event or reference number for any formal complaint.
- Avoid treating disagreement with an organisation or criticism of its conduct as evidence of incapacity.
- Respect my dignity, autonomy and right to communicate my concerns.

I am willing to communicate respectfully and cooperate with reasonable and appropriate enquiries.

5. A REQUEST TO MENTAL HEALTH PROFESSIONALS

I ask mental-health professionals to approach me objectively, respectfully and without predetermined assumptions.

If an assessment is considered necessary, I ask that it be based on my actual presentation, circumstances, functioning, relevant clinical information and direct answers to questions.

Please do not substitute a psychiatric interpretation for an investigation into the conduct of Able Point.

A person can experience distress, dispute the conduct of an organisation, make serious complaints and advocate forcefully for accountability without those circumstances automatically establishing mental illness.

I am asking for my complaints to be considered on their merits.

I am also entitled to appropriate healthcare, respectful communication and an independent clinical assessment if one is genuinely indicated.

6. WHAT I WANT

I want:

1. Accountability from Able Point.
2. Independent examination of my safeguarding complaints.
3. Transparency concerning decisions affecting my accommodation and support.
4. Preservation of relevant correspondence, incident reports and service records.
5. Recognition of my right to protest and raise complaints.
6. Fair treatment by police and mental-health services.
7. An independent assessment of the allegations I have raised.

I do not want my complaints dismissed, mischaracterised or redirected into an unnecessary dispute about my mental state.

7. MY FINAL DECLARATION

Let there be no misunderstanding.

I am alive.

I am well.

I have food.

I take my prescribed medication.

I am communicating.

I am documenting.

I am protesting.

My complaint concerns Able Point and what I believe are serious failures of accountability and possible corruption.

I am asking for those matters to be investigated, not for my right to complain to be taken away.

I want the truth established through evidence, records, proper procedures and independent examination.

I expect to be treated as a human being with dignity, autonomy and rights.

I AM NOT ASKING TO BE SILENCED. I AM ASKING TO BE HEARD.

Dr Richard William McLean
