METHODOLOGY

01 · THE COLLECTION

A public archive built to be inspected

The archive is presented as a museum, library and research interface: material can be discovered first, then followed back to its documentary source and evidentiary status.

613 PUBLIC CATALOGUE RECORDS	63 COMPLETE PDF GIT OBJECTS
8 RESEARCH QUESTIONS	259 COVER ILLUSTRATIONS LISTED

Inspection figures reported by the research presentation and subject to ongoing cataloguing and verification. They are not courtroom findings.

02 · TWO DOORS INTO THE RECORD

Read what institutions wrote. Read the testimony in its own voice.

DOOR ONE · FINDING AID

The institutional record

Correspondence, decisions, assessments, complaints, FOI material, government records, agency documents and other documentary material can be examined as records of what the relevant source actually produced.

OFFICIAL CATALOGUE | BROWSE DOCUMENTS

A filename is not a finding. A hosted document is not automatically proof that every statement within it is true.

DOOR TWO · AUTHOR'S RECORD

His voice

Testimony, writings, gospels, prophetic material, manifestos, publications and personal accounts are preserved as the author's own material and labelled accordingly.

READ TESTIMONY | SACRED LIBRARY

Author testimony is not silently presented as an independent institutional finding.

Research questions, not verdicts

The evidence centre separates documentary material, legal concepts, research questions, estimates and interpretation so visitors can see what category of material they are examining.

MODULE 01

Alleged wrongs & possible legal issues

Claims appearing in the documentary record, presented as research questions rather than criminal findings.

Follow the evidence →

MODULE 02

Ethics, rights, law & treaties

Legal instruments and principles against which documented conduct may be examined, without silently declaring a breach.

Open ethics archive →

MODULE 03

Institutions & decision-makers

Organisations and people named in the record, with documentary pathways rather than unsupported conclusions.

Inspect documents →

MODULE 04

Fraud — concept & evidence analysis

A legal and documentary framework for examining inconsistencies, elements and evidence without automatically classifying conduct as criminal fraud.

Research reports →

MODULE 05

Financial impact & resource analysis

Documented, estimated and hypothetical figures kept separate so scenarios cannot be mistaken for actual expenditure.

Open cost analysis →

MODULE 06

Protection, asylum & displacement

Distinguishes claimed circumstances, documentary evidence, legal characterisation and formal legal determination.

Read methodology →

04 · ARCHIVE CATALOGUE

Inspectable records

Every research record should lead somewhere: an identifier, title, source category, institution and route back to the underlying archive.

05 · MUSEUM & LIBRARY

A life in public time

The archive is more than a collection of PDFs. It contains books, art, academic work, media, testimony and a documented chronology.

BIOGRAPHY

Richard William McLean / Barran Dodger

The biographical record, public identity, publications and documentary history presented with source distinctions.

ENTER BIOGRAPHY →

BOOKS

Published works

Books and publications belonging to the documented literary and artistic record.

OPEN LIBRARY →

ART

Art & visual record

Art, exhibitions and visual publications can be treated as part of the historical corpus rather than decorative extras.

EXPLORE MEDIA →

EXPLORE MEDIA →

ACADEMIC

Academic work

Research candidature, academic publications and university-linked records presented with appropriate verification labels.

ACADEMIC ARCHIVE →

TESTIMONY

Testimony & statements

First-person accounts remain clearly identified as testimony and are not silently converted into institutional findings.

READ TESTIMONY →

PUBLICATIONS

Gospels & prophetic works

The distinctive publication corpus has its own door within the museum.

ENTER COLLECTION →

06 · HISTORICAL TIMELINE

Thirty years of public record

A timeline gives researchers a second way through the collection: chronology rather than document type.

1996

Transform the Primitive

Earliest named solo exhibition listed in the public biographical record.

1997

QWERTY digital work

Interactive digital work associated with a group exhibition at Linden Galleries.

2003

Recovered, Not Cured

Richard McLean's book was published by Allen & Unwin, becoming a significant part of the documented literary record.

2007

Strange Currencies of Ego & Soul

Art book and publication record.

2020

Academic work

University-linked academic material enters the documented corpus.

2026

Digital archive reconstruction

The documentary corpus is reorganised into a public research presentation while preserving the underlying evidence repositories.

OPEN COMPLETE TIMELINE

07 · FOLLOW THE EVIDENCE

One record. Many paths.

PATH

Claim → Document

Start with a research question and trace it to the documents from which the question arose.

FOLLOW CLAIM →

PATH

Person → Organisation

See where named people and institutions appear within the documentary corpus.

FOLLOW ENTITY →

PATH

Event → Timeline

Reconstruct chronology from dated documentary material.

FOLLOW EVENT →

PATH

Law → Evidence

Examine legal concepts beside the documents without assuming that a legal concept proves a violation occurred.

FOLLOW LAW →

PATH

Publication → Source

Distinguish an author's publication from independent documentary or official material.

FOLLOW PUBLICATION →

PATH

File → Verification

Check repository history, file paths, pointer/stub status and the limits of cryptographic claims.

VERIFY A FILE →

08 · METHOD & PROVENANCE

What does the record actually establish?

The archive's most important feature is not certainty. It is the ability to show the difference between a source, a claim and an interpretation.

L1 · Judicial / official determination

Formal determination by a competent authority.

L2 · Primary government record

Official material produced by a government institution.

L3 · Contemporaneous primary document

Documentary material created at or near the relevant time.

L4 · Independent corroboration

Material independently supporting another source.

L5 · Author's documented account

The author's own documented account or testimony.

L6 · Secondary source

Later reporting, commentary or secondary material.

L7 · Interpretation

Analysis derived from the documentary record.

L8 · Speculation / unverified claim

Material that remains unverified or speculative.

READ FULL METHODOLOGY | OPEN VERIFICATION PORTAL | INSPECT INVENTORY

Archive integrity statement

Git history can establish repository history. It does not, by itself, establish the truth of a document's contents. A pointer-sized PDF path is not the same thing as an inspectable PDF. A cryptographic timestamp can help establish that a digital file existed in a particular form at a particular time; it does not independently prove the truth of statements contained within that file.

INSPECT VERIFICATION | OPEN LEDGER | ARCHIVE CONTROL

09 · PUBLISHED EVIDENCE LOCATIONS

The archive has more than one door

This presentation is not intended to replace the underlying evidence stores. It gives researchers a more usable front door to them.

PRIMARY

Primary archive

Original public evidence repository and published archive.

Open archive →

PRIMARY

PUBLIC RESEARCH

Send the record, not a paraphrase.

Share the page or the source file so another researcher can inspect the same material for themselves.

COPY ARCHIVE TEXT

Research archive — not a court.

Inclusion of a person, organisation, allegation, event or legal concept does not by itself establish wrongdoing or legal liability. Readers should inspect underlying primary material, consider counter-evidence and distinguish documented facts from allegations, inference and interpretation.
