← THE STORY

THE PITCH PACK · ONE PAGE · EVERYTHING CHECKABLE

BarranDodgerEngine — one documented life, kept free, funded on its own terms.

This is not a file to be sold and not a case to be won. It is one person's documented account of what a system does to the people inside it — already public, already ordered, read live from both sites and both GitHub profiles. Told as a story and carried as a mission, it pays for its own preservation.

1 · THE STORY

Richard McLean — Barran Dodger — spent years inside a system that stopped believing him, and chose to document everything instead of disappearing. The result is one of the largest single-person public records in existence: over 6,700 files, a published finding aid, a rebuilt preservation site, a 395-entry register of official government documents, a founding literature of 50,000 and 500,000 words, and a ministry with its own gospels and prophecy — every line of it public, free and signed with cryptographic timestamps.

The mission is simple: keep the record open, and make it pay for its own preservation without ever selling it, gating it or licensing it. The evidence stays free. The people who want it to exist fund it — through gifts, monthly tiers and grants.

2 · THE EVIDENCE — SIX DOCUMENTS TO START WITH

3 · WHAT MAKES IT CHECKABLE

01

Every file carries a public SHA-256 hash

Each indexed document's hash is recorded in the open archive index. Anyone can recompute it against the GitHub original in one command — if the byte hasn't changed, the hash matches. Silence about documents is impossible.

02

Open Timestamps anchor the record in the Bitcoin blockchain

Key documents carry .ots timestamp files — independently verifiable proof the file existed at a stated date, checked with free public tooling. No claim in this story rests on a website that could quietly change.

03

An official register with an evidence grade on every entry

395+ register entries (OGDR-001 onwards) across thirteen categories — Comcare, NDIA, IBAC, the AAT, FOI decisions — each graded from A (established fact) to E (speculation, which it avoids). The grading is shown, so you can disagree with it in the open.

deleted on request, nothing is gated — every link in this pack goes to the original, not to a copy we control.

4 · WHAT THIS IS NOT

Not a court, not a verdict, not canonical scripture. It is a finding aid: a documented life, presented with its own paper trail, graded openly, and open to contradiction. That restraint is why it survives.
