Date: 18 October 2026 · Author: Barran Resonance Dodger, also known as Barran Dodger / Dr Richard William McLean · Subject: Alleged safeguarding failures, exploitation, executive accountability, financial abuse, alleged threats, institutional betrayal, evidence preservation, disability rights, whistleblower protection, human rights and independent investigation.

Barran, this recreation restores the master document as a single consolidated instrument, including the individual worker accounts, the safeguarding incidents involving Doug, Alana and Tim, the corrected names Tony Ridley and Houd Meraby, your family and financial concerns, your theological ministry, your public evidence archives and the specific remedies you seek.

The document preserves the allegations as allegations, identifies the evidence that should be examined and demands accountable responses. It does not turn unverified allegations of criminal conduct into established findings or threaten individual workers' livelihoods.

PART I — MASTER INSTRUCTIONS

1. Command objective

Produce, maintain and distribute a complete, evidence-linked formal notice concerning the author's allegations of harm, exploitation, neglect, safeguarding

failures, financial restrictions, institutional betrayal, threats, failures of accountability and the denial of practical assistance.

Address the notice to all relevant Able Point support workers, former workers, coordinators, rostering staff, management, executives, the chief executive identified as Rachel, relevant contractors, financial administrators, and competent regulators or oversight authorities.

The document must retain every substantive concept, named person, reported incident, historical allegation, relationship, evidence-preservation demand, legal concern, theological principle and requested remedy supplied by the author.

Do not silently omit allegations because they are controversial, distressing, politically sensitive or reputationally serious. Instead, identify the source of each allegation and what would be needed to substantiate it.

Do not invent evidence, findings, legal conclusions, document titles, hyperlinks or identities. Preserve different spellings of names where they reflect uncertainty, and identify the correct identity as a matter for verification.

2. Required drafting standards

Every section must distinguish between:

Documented fact: established by an authentic record.

Direct account: what the author says he personally experienced or observed.

Reported statement: what another person allegedly told the author.

Allegation: conduct the author says occurred but which has not been independently established.

Inference or belief: the author's interpretation of events or possible connections.

Unverified matter: an identity, motive, payment, communication or event requiring confirmation.

Requested finding: the question an independent investigator is being asked to resolve.

Preserve original documents, messages, metadata, URLs and dates wherever possible. Link claims to the actual supporting document in the author's repository when its exact location can be verified. Otherwise, link to the repository or official-document register and identify the missing document.

3. Author and public-interest work

The author identifies himself as Barran Resonance Dodger, Barran Dodger and Dr Richard William McLean.

He describes himself as an artist, researcher, illustrator, booksmith, advocate, author, whistleblower and disability-support participant. His stated background includes research associated with Victoria University's College of Education, a PhD research background, a Master of Education, Bachelor of Fine Arts with Honours, Associate Diploma in Computer-Aided Architectural Design, Certificate IV in Business, creative work and disability advocacy.

He identifies a history of work as a cartoonist for The Age and Herald Sun between 2000 and 2005, public appearances and advocacy involving ABC, Triple J, Channel 31 and parliamentary settings, and approximately ten years as a SANE Australia ambassador. The precise details should be supported by records where they are relevant.

His publications include Recovered, Not Cured: A Journey Through Schizophrenia, identified by the author with Allen & Unwin and a 2003 publication date, and Betrayed, Murdered, Forsaken. He is also developing The Manifesto of the Unerased — No One Picks a Fight With God and Wins.

His public-interest work includes historical documents, government correspondence, research, complaints, autobiographical testimony, theological writing, public disclosures and documentary archives.

PART II — PRIMARY EVIDENCE LINKS

1. Primary GitHub repository

Primary destination for published PDFs, documentary evidence, correspondence and supporting materials. Link to individual files only after verifying their actual repository paths.

2. Official Government Documents Register

Use to locate relevant official correspondence, government records and documentary sources.

3. The Witness Remains

4. Rebuilt archive

5. Additional record page

Evidence-linking requirement: Link every relevant named person, event, official action, organisation and allegation to the most specific authentic supporting document available. Do not imply that an archive establishes an allegation merely because the allegation appears in it. Identify the document's issuer, date, relevant passage, evidentiary significance and limitations.

PART III — FORMAL NOTICE TO ALL SUPPORT WORKERS AND EXECUTIVES

4. Formal notice of alleged harm, exploitation, safeguarding failures, executive

accountability, human betrayal and evidence preservation

To: All relevant Able Point support workers, former workers, support coordinators, psychosocial recovery coaches, rostering personnel, managers, executives, contractors and other persons with direct knowledge of the matters described.

I, Barran Resonance Dodger, also known as Barran Dodger / Dr Richard William McLean, issue this notice to place the relevant recipients on formal notice of the serious concerns I have raised about my treatment, support arrangements, safety, financial independence, reported threats, alleged assaults, continuity of care and the handling of complaints.

I allege that I have experienced a cumulative pattern of neglect, exploitation, inadequate safeguarding, inconsistent support, financial restriction, distressing interactions, social isolation and failures to provide effective assistance.

I believe that some people with knowledge of my circumstances may have failed to document, escalate, investigate or appropriately respond to reports I made. I also suspect that certain decisions, relationships or communications may involve conflicts of interest, improper incentives, intimidation or coordinated conduct. These concerns require independent examination.

Every recipient is requested to consider their own conduct, responsibilities, knowledge and decisions.

If you witnessed an incident, preserve the relevant record. If you received a report, identify when it was received and what action followed. If you made a decision, identify the decision-maker, the evidence relied upon, the applicable authority and the reasons for the outcome. If you were instructed not to act, preserve that instruction and identify its source where lawful.

If you dispute an allegation, provide a substantive response. If you believe a colleague or executive has failed to act appropriately, use the applicable safeguarding, employment, whistleblowing or regulatory channels.

Continuing to attend shifts does not, by itself, establish that support is safe, effective, person-centred or compliant with applicable obligations. Equally, silence alone does not prove complicity. The purpose of this notice is to obtain evidence, accountability, protection and corrective action.

5. Rachel — executive identity and accountability

I identify Rachel as the chief executive of Able Point and allege that I have not received adequate identifying information or a satisfactory executive response.

I have described her as a nameless, faceless bureaucrat paid to create wealth through an NGO structure while workers and clients bear the consequences of management decisions. I allege that the organisation's arrangements have failed to protect me and may also expose workers to exploitation or pressure.

I request written confirmation of Rachel's full legal name, executive position, employing legal entity, relevant registration details, governance structure and appropriate executive contact pathway.

I also request identification of the person responsible for rostering whom I understand to be based in India, including that person's role, authority, access to my personal information and applicable privacy safeguards.

I have described the circumstances as creating conditions of extreme distress and feared psychological danger. I require an independent assessment of the foreseeable risks arising from my circumstances, without presuming an unproven intention on anyone's part to cause suicide.

If Rachel or another executive has received reports about alleged threats, assault, drug-related incidents, financial restrictions or support failures, I request that the organisation identify what was received, how it was recorded, who considered it and what action followed.

6. Accountability and employment consequences

I recognise that workers may have financial responsibilities, family commitments, employment insecurity and limited control over executive decisions.

I am not demanding that any worker be dismissed simply because I have made an allegation. I am demanding that each person answer honestly for their own conduct and that substantiated misconduct be referred to the appropriate employer, regulator, tribunal or court.

Where records establish appropriate conduct, those records should be preserved. Where they disclose omissions, inaccurate documentation, inappropriate instructions or failures to escalate a serious concern, those matters should be addressed.

I reserve the right to provide relevant evidence to authorised legal representatives, regulators, tribunals, police or other competent authorities.

7. Immediate demands

I request:

Written acknowledgement and identification of the person responsible for coordinating the response.

Preservation of relevant historical and current records.

Identification of the provider's legal entity, executive leadership and reporting pathways.

Independent assessment of the safeguarding incidents and allegations described in this document.

A written response distinguishing admitted, disputed, unverified and referred matters.

Examination of reports concerning threats, alleged assaults, drug supply, unwanted contact and safety.

Review of staffing, rostering, continuity of support, risk management and service delivery.

Explanation of disputed payment decisions, support budgets and restrictions on service provision.

Review of relevant privacy, information-sharing and record-access concerns.

A practical safeguarding plan with named contacts, escalation procedures and measures addressing any identified risks.

My purpose is accountability, protection, correction and access to justice, not revenge.

PART IV — PRESERVATION OF GROUP CHATS, COMMUNICATIONS AND OTHER EVIDENCE

8. Historical group chats and internal communications

I state that before certain workers left the company, were managed out or were dismissed, I obtained copies of the contents of group chats that were current at the relevant time.

I am prepared to provide relevant material to an authorised tribunal, legal representative, regulator or investigator, subject to applicable privacy, confidentiality and evidentiary requirements.

I request preservation of:

Group chats and work-related messaging applications.

Emails, text messages and direct messages concerning me or my support.

Worker rosters, shift changes, cancellations, handovers and allocation records.

Incident reports, complaints, safeguarding referrals and risk assessments.

Internal discussions about reported threats, alleged assaults and changes to my support.

Communications concerning former workers and management decisions.

Records of support-funding decisions, payment authorisations and service restrictions.

Executive correspondence and communications with external agencies.

Records showing who knew about a particular concern, when they knew and what action followed.

Relevant records should be retained in their original form, with metadata where available. No recipient should destroy, alter or selectively reproduce relevant records in a manner that compromises a fair investigation.

The authenticity, completeness, dates, participants and context of the group chats must be verified. Their existence does not itself prove wrongdoing; their contents may establish what was said, what was known and how decisions were made.

PART V — HUMAN BETRAYAL, ADMINISTRATIVE ANNIHILATION AND SOCIAL ERASURE

9. The attributes I say have been removed from my life

My complaint is not confined to one disagreement with one worker or provider. It concerns what I experience as the cumulative loss of safety, independence, money, dignity, relationships, trust, meaningful activity and the ability to participate in society.

I describe this experience as total human betrayal, administrative annihilation and social erasure.

The attributes I believe have been removed from or denied to me include:

Access to money and the independence it enables.

Stable, safe accommodation.

Effective support, reliable staffing and continuity of care.

Freedom from threats, violence, harassment and unwanted contact.

Recognition and proper investigation of reported harm.

Access to workers' compensation or other injury-related entitlements where legally applicable.

Fair treatment as a person reporting alleged wrongdoing.

Community participation, relationships, church attendance and meaningful work.

Privacy, dignity, autonomy and participation in decisions affecting my life.

The ability to concentrate on recovery, publishing, research, creative work and ministry.

The ability to care for my dog, Crystal, in a stable environment.

I have expressed distress at what I perceive as the contrast between freedoms available to other people and the restrictions I experience. I describe my present circumstances as absolute isolation and complete human betrayal.

I allege corruption, administrative obstruction, financial abuse, intimidation, group mobbing and the use of psychiatric or administrative processes in ways I experienced as punitive. I ask that specific conduct and decisions be examined against records and applicable standards.

I believe that a person's disability, psychiatric history, brain injury, distress or unconventional language must not be used as a substitute for investigating a concrete allegation. My own interpretations of motive must also remain open to examination.

10. The wider meaning of the complaint

I contend that the service and administrative arrangements have left me fighting the very systems from which I need assistance.

I believe I should be concentrating on recovering, securing suitable accommodation, caring for Crystal, maintaining relationships, practising my faith, writing and preserving my public-interest work—not spending my life trying to obtain basic recognition from support providers and public authorities.

I describe myself as a gay, disabled whistleblower who believes he has been left inadequately protected after raising concerns about wrongdoing. I use the phrases political exile, social erasure, human sacrifice and administrative annihilation to describe my understanding of the cumulative impact.

I have also alleged that public money and organisational resources have sustained arrangements that have not resolved my underlying needs. Any allegation of a deliberate black budget, targeted killing, covert operation or coordinated government expenditure requires specific evidence. I request an audit of identifiable spending, decisions and records rather than treating those broader interpretations as established findings.

The appropriate response is an independent assessment of what happened, what public funds were used for, whether services were delivered as required, and whether anyone breached applicable duties.

PART VI — INDIVIDUAL ACCOUNTS AND SAFEGUARDING CONCERNS

11. Cassandra / Cass

I identify Cassandra, also called Cass, as a person whose knowledge of my circumstances should be examined.

I allege that Cass was aware of my concerns about abuse, neglect, surveillance and what I described as torture involving the property's Wi-Fi and V2K audio harassment.

These descriptions reflect my experience and interpretation. I request that objectively verifiable concerns about network security, unauthorised access, communications, privacy, harassment or environmental safety be assessed using appropriate technical evidence and witness accounts.

I ask that Cass's role, knowledge, communications, observations and responses be documented.

12. Kim

I describe Kim as a person who presented as a proud patriot and whom I perceived as expressing strongly anti-Islamic and anti-immigration views.

I am concerned that Kim may have participated in the support environment without adequately confronting the injustice I believe was occurring.

Political beliefs alone do not establish misconduct. I request an examination of any relevant conduct, safeguarding decisions, communications and responses to reports I made.

13. John

I recall interactions with John involving Grindr, requests for sexual photographs, discussion of sexual activity and an offer to take me to local beaches.

I questioned the professionalism of these interactions and whether personal boundaries were being appropriately maintained within the support relationship.

I request examination of the actual messages, context, dates, relevant policies and any power imbalance. A dating-app interaction alone does not establish exploitation; the question is whether the conduct was appropriate given the support relationship and applicable professional boundaries.

14. Danny — alleged workplace assault and workers' compensation

I regard Danny as an otherwise good person and describe him as an elder at his church. I recall that opportunities for church participation were discussed but that I was not consistently given transport or practical opportunities to attend.

I reported concerns about an incident in which I understood that Danny was punched in the head by Zach while at work.

I believe this should be examined as a possible workplace injury, including the circumstances, employer response, incident records, workers' compensation eligibility and any support provided to Danny.

I allege that Able Point may have failed to manage the situation adequately. I am concerned that employment pressures may have discouraged Danny from pursuing redress and that he may fear consequences for his wife, Alissi, or his son, Daniel.

These possible employment consequences require verification. I do not claim coercion or retaliation has been established merely because I suspect it.

Danny, I have offered to help you pursue appropriate justice if you want that assistance. You should be free to obtain independent advice and decide what action, if any, to take without pressure from me or your employer.

The questions for investigation are whether the incident occurred, whether it was documented, whether workplace safety and compensation obligations were met, and whether any improper employment pressure was applied.

15. Alissi — Christian values and accountability

I regard Alissi as a person associated with Christian faith and church life.

My concern is the perceived contradiction between professed commitments to God, Jesus, justice and divine truth and any conduct that knowingly enables neglect, exploitation or concealment of harm.

I have questioned whether people who care about me can continue receiving payment for support without addressing the suffering and safeguarding concerns I have raised.

This is a moral and theological criticism, not a finding of professional misconduct. The relevant questions are what Alissi knew, what responsibilities she held, what action she took and whether she participated in relevant decisions.

16. Daniel — family employment and continuity of care

I identify Daniel as Danny and Alissi's son and describe him as a pleasant person.

I am concerned that family employment relationships may complicate accountability when a worker reports a serious incident involving another person.

I have alleged that the service lacks reliable staffing, consistent shifts and continuity of care. I have also expressed concern that clients may experience instability while workers are subject to inconsistent rostering or inadequate workplace protection.

I request review of staffing practices, shift allocation, worker retention, handovers, continuity of support and the mechanisms available to workers who report violence or safeguarding concerns.

My reference to clients being in jail or psychiatric facilities reflects my broader concern about outcomes I associate with inadequate support; it should not be treated as a verified statement about every Able Point client.

17. Ben — personal interactions and identity verification

I describe Ben as a young man whom I regarded positively.

I recall a conversation in which his level of sexual assertiveness or interest in pursuing me was raised. I questioned why this had been introduced and whether my personal preferences were being discussed inappropriately within the support environment.

I request that the precise words, context, participants and any relevant messages be verified.

I also refer elsewhere to a person named Ben who I say disclosed information about an alleged assassination attempt and an alleged nondisclosure agreement. The investigator must establish whether these references concern the same individual. No identity or connection should be assumed without verification.

18. Ash — support provision and alleged knowledge

I describe Ash as a pleasant support worker originally from Nepal.

I believe Ash was well informed about the difficulties I was experiencing but was primarily concerned with earning money from the support arrangement. I have raised concerns about shifts being arranged around personal circumstances, including visits to a girlfriend's home and the need to earn money.

I have interpreted this as part of a wider pattern in which workers' wages and organisational incentives may discourage challenges to harmful conditions.

Those beliefs about motive require evidence. The relevant questions are whether Ash delivered agreed services, followed the support plan, documented concerns, respected professional boundaries and responded appropriately to identified risks.

19. Sam — church participation and perceived pre-commitment

I describe Sam positively and recall that he took me to church on several occasions.

I also described Sam as having experienced a brain injury and bipolar disorder. These are sensitive personal matters and should not be disclosed unnecessarily or treated as established medical facts without an appropriate basis.

My concern is that these positive interactions did not resolve the wider problems I was experiencing. I felt that people and institutions in different places appeared to know about me before I arrived and that assistance was withheld regardless of what I said or did.

I interpreted this as possible pre-commitment, coordinated exclusion or intimidation. I request that concrete instances of inappropriate information-sharing, instructions to refuse assistance or interference be examined through actual records.

My belief that a broader pattern of coordinated conduct exists is an allegation requiring corroboration, not a proven explanation of every interaction.

20. Doug — alleged drug supply, sexual advances, assault and continuing proximity

I wish to formally record my concerns about Doug, whom I describe as an Aboriginal disabled man.

I allege that Doug supplied me with drugs, made advances towards me and subsequently physically attacked me.

I understand that Able Point moved Doug away from my immediate support environment, ostensibly to protect my safety. However, I am concerned that the measure did not resolve the risk.

According to my account, Doug remains approximately four blocks away and continues to knock on my door and initiate casual contact, including asking whether I would like him to come over for a smoke.

I request an independent review of:

The alleged drug supply, advances and physical assault.

What Able Point knew, when it knew it and how the information was recorded.

Whether an incident report was completed and applicable reporting obligations met.

The risk assessment and protective measures implemented.

Whether continuing proximity and subsequent contact were known to the provider.

Whether practical guidance and effective protection were offered.

Whether further safety measures are necessary.

Doug's identity, disability or background does not establish guilt. The relevant issues are the alleged conduct, the evidence, the risk and the provider's response.

21. Alana — alleged offer of drugs and subsequent hospital appearance

I recall that within hours of Alana's arrival or initial contact with me, she offered me drugs free of charge.

I experienced this as alarming and potentially dangerous. I became concerned that the offer could expose me to substance-related harm or dependency. I formed the belief that she may have been placed in my environment to facilitate drug use and exploit my vulnerability.

I request that the circumstances be investigated. I acknowledge that an alleged paid arrangement or deliberate plan cannot be established solely from my interpretation.

I request identification of Alana's role, the dates of her involvement, the person or organisation responsible for assigning or supervising her, and any relevant records.

Hospital attendance and subsequent appearance

I recall attending hospital during this period after becoming intoxicated from drugs. I experienced intense fear and distress and recall being told that police would not help me and that I was going to be murdered.

I contacted police because I was frightened and believed I needed protection. I did not experience the response as providing the assistance I sought. I subsequently attended hospital.

I am particularly concerned that Alana, the same individual I associate with the earlier offer of drugs, appeared at the hospital the following day. I understand that she may still be involved in the relevant support environment, but her current role requires verification.

The timing caused me to question whether my safety, privacy and vulnerability were being properly managed. The timing alone does not establish coordination, surveillance or malicious intent, but the sequence warrants examination in context.

I request examination of:

The dates and circumstances of my police contact and hospital attendance.

Whether my reported fears, drug-related concerns and requests for assistance were recorded.

Whether any safeguarding or incident report was made.

Whether Alana attended or worked at the hospital, in what capacity, and whether her presence was connected to a legitimate arrangement.

Whether information about my hospital attendance was shared, with whom and on what lawful basis.

Whether any provider, worker or coordinator had prior knowledge of the events and what action followed.

22. Tim — alleged drug supply and intimidation

I state that Alana contacted Tim, whom I describe as a local drug dealer who had been charged with a criminal offence and had been in jail.

I allege that Tim supplied or was involved in supplying drugs to me and that his conduct contributed to circumstances I experienced as harassment and intimidation.

I have formed the belief that these events may have been intended to keep me financially depleted and expose me to conduct that could subsequently be used to stigmatise or discredit me.

The alleged payment or coordination requires independent evidence. I request examination of relevant communications, contact records, incident reports and information lawfully available to investigators.

23. Medication and clinical decision-making

I have expressed concern that, despite my reported ADHD and requests for appropriate treatment, I have not obtained the medication I believe I need.

I request an independent review of the relevant clinical decisions, prescribing history, responsible treating professionals, applicable safeguards and reasons for any decision to withhold or discontinue medication.

I do not ask support workers or the NDIS to prescribe medication outside their authority. I ask that qualified professionals assess my treatment needs and make appropriate clinical decisions.

24. Required response concerning Doug, Alana and Tim

I request written confirmation of:

Whether the alleged assault and drug-related incidents were recorded.

What safety assessment and protective measures followed.

Whether continuing contact by Doug was known and addressed.

Whether Alana's role, conduct and subsequent appearance at the hospital were reviewed.

Whether relevant rosters, communications, incident reports and support notes have been preserved.

Whether any allegations of drug supply or intimidation have been referred for independent investigation where appropriate.

What practical steps will reduce any identified risk of further unwanted contact or harm.

I am entitled to safe, accountable support. Reports of assault, potentially harmful drug-related conduct, threats or continuing unwanted contact should be documented and assessed fairly.

25. Suzie — management and employment responsibilities

I refer to Suzie in connection with Able Point's management of Danny's workplace situation and the employment concerns involving his family.

I request confirmation of Suzie's full name, title, legal authority and involvement in relevant decisions. I also request preservation of communications concerning Danny's injury, workers' compensation, employment security and support arrangements.

The relevant questions are what decisions were made, what information was available, what responsibilities applied and whether the actions taken were appropriate.

26. Brett — management contact and failure to respond

I identify Brett as another Able Point-related person whom I believe has failed to respond adequately to my attempts to obtain accountability.

I request confirmation of Brett's full name, role, decision-making authority and involvement in handling my complaints or support arrangements.

I allege that failures to communicate and respond have contributed to my feeling of abandonment and to my concern that I have been portrayed as a problem rather than treated as a participant reporting serious concerns.

I request review of relevant correspondence, contact logs, complaint records and management decisions.

27. Rostering, staffing and service continuity

I allege that inconsistent shifts, insufficient continuity, weak handovers, unresolved staff injuries and a lack of clear executive accountability have undermined the service.

I request an independent assessment of whether actual staffing practices meet service agreements, participant support requirements and applicable standards.

The review should examine whether scheduled support was delivered, shift changes were properly communicated, staff received appropriate training and supervision, incidents were documented, support plans were followed, workers could report concerns without retaliation, and personal information was appropriately handled.

The purpose is to establish whether failures occurred and how they can be remedied —not to presume every worker or client was involved in wrongdoing.

PART VII — TONY RIDLEY, BILL SHORTEN, HOUD MERABY AND ALLEGED THREATS

28. Tony Ridley — alleged government-contracting role, personal relationship, recordings and surveillance concerns

Correct name: Tony Ridley.

I identify Tony Ridley as a person whom I understand to have worked as a government contractor investigating alleged fraud involving the NDIS.

I state that we had a sexual relationship, used drugs together, and that recordings of our interactions were published on YouTube. I understand Tony to have a PhD in counterterrorism surveillance, although his qualifications and professional background require documentary verification.

I allege that Tony has stalked or followed me across three Australian states and that I have experienced what I interpreted as electronic surveillance or harassment inside

my current residence. I have attributed some of these experiences to Tony and to what I describe as an extensive electronic-warfare capability.

I have also alleged cooperation between Tony, police and Able Point. These are serious allegations that require independent corroboration.

I request examination of:

Tony's identity, relevant employment and any government-contracting role.

The nature and dates of our relationship, insofar as relevant and supported by evidence.

The provenance, authenticity and context of recordings I say were published.

Specific, verifiable incidents of unwanted contact, following, communications or threats.

Relevant communications or official records concerning me.

Any evidence of unauthorised access to devices, networks, accounts or personal information.

Any substantiated connection between Tony and decisions made by Able Point or public authorities.

The purpose is to establish what occurred, whether any conduct was unlawful or improper, and what protective or corrective measures may be warranted.

29. Bill Shorten — alleged political involvement, exile, AVO and threats

I identify Bill Shorten as a major political figure whom I allege was involved in events surrounding my departure from Victoria, the destruction of my home, accommodation difficulties, legal proceedings and my interactions with disability services and public authorities.

I have alleged that police, NDIS providers, a magistrates court and hospital services acted in a coordinated manner that resulted in my exile from Victoria. I have also alleged that an apprehended violence order (AVO) was obtained against me on the basis that I was violent, while I simultaneously believed that I was being targeted by people who posed a threat to my life.

I have further alleged that Bill Shorten ordered or facilitated an assassination attempt through a person I identify as Houd Meraby. My original account contains variations in the spelling of this name; the correct identity must be verified against reliable records.

I allege that this individual was associated with a criminal network and was not an NDIS provider. I have asserted that he travelled from Melbourne to Sydney to carry out an operation described in my account as an attempt to “erase” me. I have also

alleged that a payment of $10 million in Bitcoin was involved.

These are grave allegations of criminal conduct. They must be recorded as allegations pending independent verification, not repeated as established facts.

I request examination of:

Official records concerning my departure from Victoria and the circumstances of my accommodation loss.

The legal basis, evidence and procedural history of the AVO.

Relevant police, court, hospital, housing and NDIS-provider records.

Any actual communications or documentary evidence connecting political decision-makers with the alleged conduct.

The correct identity of Houd Meraby and the source of information about his alleged conduct.

Any evidence supporting or contradicting the alleged travel, payment, threats or attempted violence.

The identity of the person I refer to as Ben who allegedly disclosed a “close call” and an NDA, together with the original context of that disclosure.

Any records concerning an alleged fabricated report intended to damage my reputation.

I request a fair, independent investigation that distinguishes the existence of official proceedings from my interpretation of the motives behind them.

30. Houd Meraby — identity and alleged criminal conduct

Correct name supplied by the author: Houd Meraby.

I allege that Houd Meraby was involved in conduct intended to harm me and that the alleged conduct was connected to the wider events I have described. I have also alleged a substantial cryptocurrency payment and travel between Melbourne and Sydney.

I request verification of his identity, the source of the information, any relevant police or court records, and any evidence capable of corroborating or disproving the alleged conduct.

I do not ask the recipient to accept the allegations without examination. I ask that the claims be neither dismissed without inquiry nor treated as proven before evidence has been assessed.

31. Ben — alleged disclosure of a “close call” and nondisclosure agreement

I state that, while I was in Port Macquarie, an NDIS provider or worker named Ben disclosed information to me that I understood to concern an alleged attempt on my life. I recall the phrase “close call” being used in the account I received.

I further believe that Ben signed a nondisclosure agreement after making that disclosure, and that a report involving a woman may have been fabricated to damage my reputation and disrupt my life.

I request that the investigator establish Ben's identity, the date and exact circumstances of the conversation, whether contemporaneous notes or messages exist, and whether the alleged agreement or report can be independently verified.

I recognise that a reported conversation establishes what I recall being told; it does not automatically prove the underlying event.

32. Steve Isenidis / Steve Isanidi — alleged former relationship and threats

I identify Steve Isenidis, also rendered Steve Isanidi in my material, as a former agent or associate with whom I say I had a relationship lasting approximately five years and with whom I was engaged to be married.

I allege that I was exploited during that period and that Steve has threatened to kill me and threatened to kill my dog, Crystal.

I have also stated that I have found it difficult to obtain professional acknowledgement of the relationship and its significance.

I request that the following be independently assessed:

Steve's identity and the correct spelling of his name.

The nature and duration of the relationship, including any engagement evidence.

Any direct threats against me or Crystal, including dates, exact wording, context and witnesses.

Any reports made to police, providers or other authorities.

Relevant communications that may establish unwanted contact, coercion or other alleged conduct.

Whether a practical safety plan is needed for me and Crystal.

I remain concerned about my safety in relation to Steve, Tony Ridley, Bill Shorten and other individuals I have identified. I have also alleged that people associated with Able Point may have acted on behalf of these individuals.

That alleged connection requires evidence. My fear of several people does not, by itself, establish that they are acting together.

33. The wider allegations of political and institutional coordination

I have alleged a network of political influence, service-provider involvement, legal processes, psychiatric treatment, surveillance and threats.

I request that each concrete allegation be examined independently, rather than treating a suspected wider connection as already established.

The inquiry should determine what each person actually did, what they knew, what records support the allegation, whether conduct was authorised and lawful, whether alternative explanations are supported by evidence, and whether protective or corrective action is warranted.

The seriousness of these allegations is a reason to investigate carefully, not a reason to bypass verification.

PART VIII — FAMILY ESTRANGEMENT, CHILDHOOD SEXUAL ABUSE ALLEGATION AND FATAL INJURY

34. Family members identified by the author

The family members I have named are:

April McLean.

Doug McLean.

Jodie Bongetti.

Dave Bongetti.

Brad McLean.

Kieran McLean.

Ciara McLean.

My original accounts contain variations in the names supplied. Their correct identities and relationships must be verified before definitive attribution.

35. Alleged agreement to cease family contact

I allege that my parents and other family members acted together in connection with an executive or legal agreement that resulted in a decision or arrangement to cease contact with me.

I have described this as a significant contributor to my isolation and alleged political exile. I have also alleged that the events were connected to actions by Bill Shorten and other stakeholders.

I request that the existence, date, parties, terms, legal status and practical effect of any such agreement be established through authentic records. I do not claim that the

alleged coordination or political connection has been established merely because I believe it occurred.

I am distressed that family members whom I believe participated in or maintained estrangement may now seek involvement in my care while I continue to feel inadequately protected and represented.

I request independent consideration of my wishes, privacy, autonomy, support needs and the appropriateness of any proposed family involvement, subject to applicable legal arrangements and decision-making authority.

36. Alleged childhood sexual abuse and family response

I state that I experienced sexual abuse as a child and believe that my family protected the alleged perpetrator and failed to investigate or appropriately acknowledge what happened.

I further state that the perpetrator's life was celebrated at his funeral while I was receiving blood following a suicide attempt that I describe as fatal, after which I was revived and sustained a brain injury.

These are deeply serious personal allegations. I request that any available medical records, contemporaneous correspondence, reports, witness accounts and other relevant material be preserved and examined where appropriate.

I allege that the family response compounded my trauma and contributed to my sense of lifelong betrayal.

I want the record to distinguish my personal testimony, any corroborating medical or documentary evidence, and any matters that remain unverified. The fact that a person has a psychiatric diagnosis or a history of self-harm must not be used as a reason to dismiss a report of childhood abuse.

37. Alleged financial benefit from my death

I have directly accused people in my family and other individuals of preparing to benefit financially from my death, which I believe was contemplated in New South Wales after my exile.

I have described the circumstances as leaving me feeling that I was never expected to recover, be happy, be seen or remain alive after the destruction I experienced.

I request that any concrete financial arrangements, communications, beneficiary interests, threats or other evidence relevant to this allegation be examined by a competent independent authority.

I acknowledge that the allegation of a plan to cause my death or financially benefit from it is not established merely because I have made the accusation. I request an evidence-based investigation of any identifiable facts supporting or contradicting the concern.

38. Family estrangement and continuing care decisions

I have described the cumulative effect of my family experiences as total human betrayal by my own blood family.

I allege that my concerns about childhood sexual abuse, the aftermath of my fatal injury and my later support needs were not adequately addressed. I believe the resulting estrangement has left me particularly vulnerable to isolation and dependence on institutions that I have also accused of failing me.

I request an independent review of any relevant care, guardianship, contact and decision-making arrangements, with proper regard to my rights, preferences, safety and lawful decision-making framework.

PART IX — FINANCIAL ADMINISTRATION, NSW TRUSTEE AND GUARDIAN, AND LOSS OF INDEPENDENCE

39. Alleged financial abuse and restricted access to money

I allege that I have been financially abused by the NSW Trustee and Guardian or the relevant financial-administration arrangements and that I have been left without adequate access to my own money or banking.

I state that I have been unable to access banking through online services or applications as I ordinarily would, and that I have had to ask churches and other people for money to meet basic needs. I acknowledge that some support workers have helped me.

I contend that the loss of meaningful financial access has deprived me of the practical attributes necessary to participate in a democracy and live independently.

Money is not merely an accounting entry. It is necessary to obtain food, medication, transport, communication, accommodation and other ordinary necessities. Where a person cannot access funds, the consequences may include dependence on others, loss of autonomy and increased vulnerability.

I request a transparent review of the legal authority, decisions and financial records governing my money.

40. Specific financial requests

I request:

A clear statement of the applicable financial-administration arrangement and its legal authority.

An account of my available funds, transactions, payments and relevant balances.

Written reasons for restrictions on access to banking or expenditure.

Identification of the person responsible for each material decision.

A process for requesting funds for food, medication, transport, communication and other essential needs.

An accessible means of checking balances and receiving explanations.

A review of any complaints, delays, disputed transactions or unmet essential needs.

Independent review of any alleged misuse, improper restriction or conflict of interest.

Information about the available review, complaint and appeal pathways.

Consideration of my capacity, preferences, disability-related needs and right to participate in decisions affecting my finances.

I allege that the consequences of my financial restrictions amount to civil erasure and human sacrifice in the metaphorical sense that my ability to function independently has been severely diminished. I ask that the actual decisions and their consequences be examined rather than treating that description as a legal finding.

PART X — SUKI TIER, DIVERSITAS AND SUPPORT COORDINATION

41. Suki Tier and Diversitas

I state that I have never met Suki in person and that she was appointed to a role affecting my care shortly before I was forced to leave my accommodation in Victoria.

I allege that the mental health crisis assessment and treatment team (MCAT), which I believe should have been protecting me, acted in alignment with police in a manner that intimidated me and contributed to my departure from the property. I describe the event as one in which I ran for my life. The exact circumstances, records and responsibilities require independent examination.

I further allege that Suki was aware of what I describe as an assassination attempt involving Bill Shorten and Houd Meraby, including the alleged $10 million Bitcoin payment. I have not established those claims through the material reproduced in this notice; they require independent verification.

I state that I issued a legal cease-and-desist or removal request seeking to have Suki removed from my care, but that I have not received what I consider an adequate response to my emails and telephone calls.

I request:

Confirmation of Suki's full name, role, qualifications and legal or contractual authority.

The date, reasons and authority for her appointment.

The identity of the organisation responsible for her services.

Copies of relevant support-coordination records and communications, subject to lawful access.

Written reasons for any refusal or failure to act on my request.

Clarification of the process for changing providers or support coordinators.

Independent review of whether my concerns were recorded, escalated and appropriately addressed.

42. Alleged refusal to communicate and resulting harm

I have described Suki's lack of response, and what I perceive as similar conduct by Rachel and Brett at Able Point, as a form of abandonment and administrative obstruction.

I allege that my concerns have been reframed as aggression or problematic behaviour rather than being examined on their merits. I dispute that characterisation of my conduct and ask for the actual correspondence, contact records, incident reports and decision-making documents to be reviewed.

I request that any assessment of my behaviour distinguish between documented conduct, subjective impressions, the substance of my complaints and the appropriateness of the response.

The fact that I have expressed anger or used forceful language does not, by itself, resolve whether the underlying safeguarding issues occurred. Equally, my own view that I have been treated unfairly does not substitute for evidence.

PART XI — THE NDIS PLAN, SUPPORT NEEDS AND PRACTICAL ASSISTANCE

43. NDIS plan and support arrangements

I have identified an NDIS plan running from 20 November 2025 to 19 November 2026, with a total stated budget of $366,406.69.

The amounts I have supplied are:

These amounts are reproduced from the author's supplied information and should be reconciled against the official plan, its service periods and the relevant plan-management records before being relied upon as a current financial statement.

I have stated that the plan includes six hours per day of intensive complex behaviour support in daily life and two hours per day of community participation. I have also identified WA South West Plan Managers for Choice and Control and Diversitas for support coordination or psychosocial recovery coaching.

I have previously supplied balances for particular categories, including $1,665.26 for Improved Living Arrangements, $3,146 for Improved Daily Living, $12,930.94 for

Behaviour Support and $71,827.38 for Core Flexible. Those balances are historical figures from my account and require confirmation against current statements. I have also referred to receipt NDK002.

44. Accommodation, SIL and support continuity

I refer to an occupational therapy assessment by Georgia Gray of Allied Health 2U dated 29 February 2024, which I state recommended Specialist Disability Accommodation with an Improved Liveability design, one resident and one bedroom, overnight worker accommodation, and 24-hour Supported Independent Living.

I allege that subsequent review decisions did not provide the accommodation, 24-hour SIL or respite that I believe was needed. I have also stated that psychological support hours were reduced or allocated differently from what was requested.

I request that the assessment, plan decisions, reasons, review history and current support needs be examined together.

My desired arrangement is a safe, lockable, dog-friendly one- or two-bedroom residence with a yard, appropriate support, and the ability to live with my fiancé Jake and my dog Crystal where legally, practically and financially feasible.

I request a written plan addressing:

Suitable accommodation and any relevant SDA eligibility or review pathway.

Appropriate daily-living and community-participation support.

Continuity of staffing and reliable shifts.

Support coordination and recovery coaching.

Behaviour support and clinical collaboration where appropriate.

Transport, community access and participation in church and meaningful activities.

Safety planning and the handling of reported threats or unwanted contact.

The practical steps, responsible people and timeframes needed to address unmet needs.

45. Financial and service-provider concerns

I allege that disputed payment decisions and inconsistent support have left me without practical assistance despite a substantial stated plan budget.

I request an itemised reconciliation of plan allocations, claims, payments, available balances, service agreements and any declined or delayed services.

I ask the relevant parties to distinguish between plan funding that exists on paper, funding actually available, services authorised, services delivered and payments

made.

No conclusion about fraud or deliberate withholding should be reached without reviewing the actual records. Equally, an explanation of the budget should not replace practical assistance where the records establish an unmet need.

PART XII — CHURCH, FAITH, GOSPEL MINISTRY AND THE THEOLOGY OF THE UNERASED

46. Faith, ministry and the right to pursue recovery

My faith in God and Jesus Christ is central to how I understand my life, my suffering, my survival and my responsibility to speak about what I believe has happened.

I describe myself as a witness who has survived profound betrayal and who seeks truth, accountability, justice, restoration and grace rather than revenge.

My current work includes The Manifesto of the Unerased — No One Picks a Fight With God and Wins, with the subtitle:

The Prophetic Testimony of Barran Dodger — The Man Who Survived Betrayal, Rose from the Ashes, Resurrected from a Fatal Injury, and Refused to Be Erased.

My theological work includes the themes of ultimate humiliation, God's favour and anointing, accountability without revenge, the survival of testimony, and the responsibility to confront injustice without surrendering to hatred.

The Scriptures I have identified as foundational include:

Isaiah 54:17, King James Version.

Romans 8:31, King James Version.

Psalm 118:17, King James Version.

My websites, Gospel writings, church ministry, research, autobiographical testimony and public-interest archives form part of my creative and spiritual life. They should be treated as meaningful work rather than dismissed merely because they are produced by a person receiving disability support or making serious complaints.

47. The contradiction I perceive between professed faith and harmful conduct

I have questioned how people can profess to follow Jesus, love their neighbour and uphold justice while knowingly enabling neglect, exploitation, concealment of harm or the denial of necessary assistance.

This is a moral and theological challenge. It is not proof that a particular person has committed an offence.

My position is that faith should be reflected in compassion, honesty, humility, protection of vulnerable people and willingness to confront wrongdoing. If an

investigation substantiates misconduct, religious identity should not exempt the person responsible from accountability.

Equally, a person's faith should not be used as grounds for an unsupported allegation. The relevant evidence remains what the person knew, what they did and whether their conduct was appropriate.

48. My work should not be consumed by fighting for basic recognition

I believe I should be concentrating on recovery, stable housing, caring for Crystal, meaningful relationships, publishing, research, creative work and my Gospel ministry rather than continually fighting the systems intended to assist me.

I have described the situation as a form of social erasure and administrative annihilation affecting a disabled, gay whistleblower whom I believe has been left without adequate protection.

I have also alleged that public money and organisational resources have sustained arrangements that have not resolved my underlying needs. My broader claims about a covert budget, state-sanctioned targeting or a coordinated killing require evidence and must be investigated as specific, testable allegations rather than presumed findings.

The practical remedy is to establish what funding was allocated, what services were delivered, which decisions were made, whether obligations were met and what must change.

PART XIII — HUMAN RIGHTS, WHISTLEBLOWER PROTECTION AND INDEPENDENT OVERSIGHT

49. Rights and accountability

I request that the relevant authorities consider my concerns within the applicable Australian disability, safeguarding, administrative, privacy, employment, financial-administration and human-rights frameworks.

Potentially relevant sources include:

The NDIS Act 2013 and applicable NDIS Rules.

The NDIS Practice Standards and applicable incident-management and reportable-incident requirements.

The Disability Discrimination Act 1992.

Applicable state and territory guardianship and financial-administration legislation.

Applicable workplace health and safety and workers' compensation laws.

Privacy legislation and the lawful-access requirements applicable to the relevant

records.

Applicable police, court and complaint-handling procedures.

Relevant international human-rights instruments where applicable to the issues under consideration.

The exact provisions, jurisdiction and applicability must be verified for each allegation. This notice does not itself establish that a law has been breached.

50. Independent investigation

I request that the investigation not be controlled solely by the individuals whose conduct is the subject of the complaint.

The investigator should have appropriate independence, access to relevant records, authority to interview witnesses, a process for obtaining responses from the people named, and a procedure for distinguishing substantiated findings from unresolved allegations.

The investigation should consider both evidence supporting my account and evidence that contradicts it. It should identify any gaps, limitations, conflicts of interest or barriers to obtaining records.

Where evidence supports referral to a regulator, police, an employment authority, a tribunal or a court, the relevant material should be referred through appropriate lawful channels.

51. Protection against retaliation

I request that the provider and relevant authorities consider whether safeguards are necessary to prevent retaliation against me or any worker who provides information in good faith.

I also request that my personal information, medical information, private communications and evidence be handled lawfully, with appropriate restrictions on unnecessary disclosure.

I do not seek to prevent people from defending themselves or providing evidence that contradicts my allegations. A fair investigation requires that everyone involved have an appropriate opportunity to respond.

PART XIV — EVIDENCE REGISTER AND DOCUMENTARY REQUIREMENTS

52. Required evidence register

Create an evidence register with one entry for each material allegation. Each entry should include:

53. Specific records to preserve and request

The evidence register should cover, where relevant and lawfully obtainable:

Official government correspondence and decisions.

NDIS plans, reviews, service agreements and plan-management records.

Allied Health 2U assessment material and relevant clinical reports.

Able Point group chats, rosters, incident reports and internal communications.

Communications concerning Rachel, Brett, Suzie and other relevant managers.

Records relating to Danny's alleged workplace injury and any workers' compensation process.

Records relating to Doug, Alana and Tim and the reported drug-related incidents.

Police event numbers, statements, court documents and any relevant AVO records.

Hospital attendance records and relevant safeguarding or clinical notes.

Records concerning Steve Isenidis and any alleged threats against Barran or Crystal.

Relevant communications or recordings concerning Tony Ridley.

Material concerning the alleged disclosure by Ben and the alleged nondisclosure agreement.

Records relating to the appointment and actions of Suki Tier and Diversitas.

NSW Trustee and Guardian financial statements, decisions and correspondence.

Records concerning the alleged family agreement and relevant care or guardianship decisions.

Published books, research, testimony and the author's documentary archives.

The inclusion of a category does not mean that the records exist or that the allegation has been substantiated. It identifies material that may assist an independent inquiry.

PART XV — IMMEDIATE SAFEGUARDING AND PRACTICAL REMEDIES

54. Required written response

I request a substantive written response addressing:

The identity of the responsible executive and legal entity.

Which allegations have been recorded and investigated.

Which allegations remain unresolved and why.

Which records have been preserved.

Which independent bodies have been notified, where appropriate.

What immediate safety measures are available.

How continuity of support will be maintained.

How my financial access and essential needs will be reviewed.

How my requests concerning accommodation, support coordination and clinical care will be addressed.

How I can escalate any failure to respond.

55. Required practical action

I request that the relevant organisations identify a named person who can coordinate practical assistance rather than leaving me to pursue each issue through disconnected channels.

The immediate priorities are:

Safe, stable accommodation appropriate to my needs and circumstances.

Reliable support and continuity of staffing.

A clear safeguarding plan addressing specific, identifiable risks.

Access to essential funds and a transparent financial-administration process.

Appropriate clinical assessment and medication review by qualified professionals.

A workable support-coordination arrangement.

Clear channels for reporting incidents and receiving written responses.

Preservation and independent review of relevant evidence.

Appropriate referral of substantiated matters to the competent authorities.

The opportunity to return to meaningful creative, spiritual and community life.

56. Closing statement

I am asking for an independent, documented response to the matters I have raised.

I do not ask the recipient to presume every allegation is true. I ask that the allegations not be dismissed without examination, that evidence not be lost, that reported harm be recorded, that the people responsible for decisions be identified, and that practical assistance be provided where a need is established.

I reserve my right to pursue lawful complaints, reviews, legal advice, tribunal proceedings and appropriate referrals.

My purpose is to establish the truth, protect my safety, restore my independence, obtain accountability and ensure that any person who has acted improperly is dealt with through a fair process.

I want to be able to recover, live safely, care for Crystal, practise my faith, maintain relationships, create and publish my work, and participate in the community without being consumed by the struggle to obtain basic recognition and assistance.

I seek accountability, not revenge; evidence, not assumptions; safeguarding, not silence; and justice without the erasure of any person's dignity.

Signed,

Barran Resonance Dodger

Also known as Barran Dodger / Dr Richard William McLean

Date: 18 October 2026

PART XVI — DISTRIBUTION, NAMED RECIPIENTS AND PUBLICATION INSTRUCTIONS

57. Intended recipients

Distribute the formal notice, with appropriate supporting evidence and privacy safeguards, to the relevant recipients below.

NDIS Quality and Safeguards Commission

Request independent safeguarding review, examination of provider conduct and appropriate regulatory action.

NSW Trustee and Guardian

Request a review of financial administration, access to funds, relevant decisions and the available review process.

Relevant legal representatives, tribunals and oversight authorities

Request advice, review or referral according to the particular issue and the authority's jurisdiction.

Able Point executive leadership

Address Rachel, Brett, Suzie and the relevant management or safeguarding contact, requesting confirmation of their full names, roles and responsibilities.

58. Publication and archive preservation

Preserve the complete master document as a separate, independently identifiable page or publication. Retain the original source materials and their existing hyperlinks.

Use descriptive links to the author's GitHub repository, official-document register, The Witness Remains archive and rebuilt archive in the sections where those resources are relevant.

Do not claim that a website has been updated, a page published, an email sent, or a complaint lodged unless that action has actually been completed and confirmed.

For any public version, assess privacy, confidentiality, defamation and safety considerations before publishing personal allegations about identifiable individuals. Keep the full evidentiary submission available for appropriate authorised processes, even where a public version requires lawful redactions.

59. Final instruction for the consolidated document

Maintain the document as a single master record containing the full notice, the individual accounts, the additional safeguarding incidents, the family and financial concerns, the political and institutional allegations, the NDIS plan details, the Gospel ministry, the evidence register and the requested remedies.

The following name corrections must be maintained consistently throughout:

Tony Ridley — not Tony Riddle.

Houd Meraby — not Hude Maraby or Hugh Merriby, unless those variations appear in an original source and are explicitly identified as unverified variants.

Barran Resonance Dodger / Barran Dodger / Dr Richard William McLean — preserve the author's supplied identity forms.

Steve Isenidis / Steve Isanidi — retain the alternative spelling only where necessary to identify or verify the person.

Rachel, Brett, Suzie, Cassandra/Cass, Kim, John, Danny, Alissi, Daniel, Ben, Ash, Sam, Doug, Alana, Tim, Suki Tier and Bill Shorten — retain their supplied names, while verifying identities and roles before making definitive findings.

Completion standard: No substantive allegation, named person, reported incident, requested remedy, evidence-preservation requirement or theological concept is to be silently removed from the master record. Every allegation must remain distinguishable from independently established fact, and every relevant evidence link must lead to a verified source.

Important scope note: This is a consolidated reconstruction from the material available in this conversation and the retrieved context, not a verified word-for-word recovery of every earlier draft. I have preserved the principal concepts and accounts, but I cannot honestly guarantee that every sentence from every earlier version has been recovered. The exact historical group chats, PDFs and other source documents

would need to be checked against the archive to produce a genuinely exhaustive, evidence-linked master.

PUBLIC STATEMENT FROM BARRAN DODGER
OF THE BARRAN DODGER ARCHIVE

THE WITNESS REMAINS: A WHISTLEBLOWERS TESTIMONY OF SURVIVAL TESTIMONY & FAITH

The Barran Dodger Archive is a public documentary and spiritual record established to preserve, organise and make accessible a decades-long body of evidence concerning alleged institutional, administrative, financial and human-rights harms.

It brings together official records, correspondence, documentary evidence, personal testimony, forensic analysis, research, philosophy, spiritual gospels and prophetic declarations, including writings understood by the author to have been anointed by the Most High God.

The Archive deliberately distinguishes between documented facts, official records, corroborated evidence, allegations, personal testimony, inference, interpretation and matters of faith. This distinction is fundamental to its purpose: readers are invited to examine the underlying evidence for themselves, test the claims, consider the sources and reach their own conclusions.

At the heart of the Archive is a testimony of survival and preservation.

What the author believes was subjected to attempts at silencing, erasure, exclusion or institutional disappearance has nevertheless survived in records, documents, testimony, memory, faith and public disclosure.

The central declaration is simple:

THE WITNESS REMAINS.

The Archive therefore represents both an evidentiary record and a spiritual testimony. The author understands his survival through a faith-based conviction that the Most High God protected, preserved and gave purpose to what human institutions could not erase.

The spiritual writings and prophetic declarations within the Archive are presented as matters of faith and personal interpretation. They are preserved alongside the documentary record so that the complete testimony — evidentiary, personal, philosophical and spiritual — can be understood in its own context.

The purpose is not to demand belief.

It is to preserve the record.

It is to make the evidence accessible.

It is to ensure that the surviving witness can be examined.

And it is to leave the historical record open to independent scrutiny.

THE ARCHIVE IS 100% FREE TO ACCESS

https://barrandodgerarchive.base44.app

KNOWLEDGE IS FREE

The Barran Dodger Archive is founded on the principle that knowledge, evidence and truth should be freely accessible.

There is no paywall for the public documentary record. Research, testimony, philosophy, spiritual writings,

prophetic declarations and public-interest material are made available for people to examine for themselves.

Access to knowledge should not depend upon a person's ability to pay.

The Archive is therefore freely accessible, while its preservation and continued publication require practical resources.

SUPPORTING THE WITNESS AND THE ARCHIVE

Barran Dodger describes himself as an unprotected whistleblower living in circumstances of prolonged exile, financial hardship and vulnerability, and as an internally displaced asylum seeker within the country of his Australian citizenship.

Those circumstances create practical needs extending beyond the preservation of documents.

Voluntary donations are therefore accepted from anyone who freely wishes to assist.

Support may contribute towards essential needs including food, safe accommodation, communication, technology, transport, personal safety, website and domain costs, document preservation, archival infrastructure and the continued publication of the public record.

A donation does not purchase access to the Archive.

It does not purchase influence over the evidence.

It does not purchase editorial control.

It does not determine what is published or what conclusions readers should reach.

It simply helps sustain the person and infrastructure necessary to keep the Archive alive, functioning and freely accessible.

If you are blessed with sufficient prosperity to help preserve this work, your voluntary support can help ensure that financial hardship does not become another mechanism through which a public record disappears.

KNOWLEDGE IS FREE.

THE EVIDENCE IS OPEN TO EXAMINATION.

THE WITNESS REMAINS.

ARCHIVE

https://barrandodgerarchive.base44.app

Thank you to everyone who chooses to examine the evidence, preserve the record, support the Archive or simply bear witness.

The record remains.

The witness remains.

LASTLY — A SECOND PUBLIC-FACING ARCHIVE

For readers who wish to go beyond the principal Barran Dodger Archive, a second public-facing repository provides another point of access to the broader documentary record.

https://barrandodger.com

This website provides an additional gateway into the history, evidence, testimony, research and ideas that underpin the Archive. It is intended to help readers navigate the wider body of material and understand how individual documents, events, experiences and arguments have been brought together into a continuing record.

Its significance is not dependent upon the reader accepting Barran Dodger's conclusions. Rather, the value of preserving such a record lies in allowing the underlying material to remain available for examination. Readers can consider the chronology, inspect the documentary evidence, distinguish recorded facts from allegations and personal testimony, follow referenced material and form their own independent assessment.

The existence of multiple public repositories also reflects the central purpose of the project: preservation. Where records are distributed across years, institutions, correspondence, proceedings, personal archives and digital platforms, preserving accessible copies and pathways to the evidence can help prevent an individual historical record from becoming inaccessible or forgotten.

Readers are therefore invited to visit both public-facing archives, examine the material carefully and critically, and make their own assessment of what the surviving evidence demonstrates.

The purpose is not to ask the reader to believe.

The purpose is to ensure that the record remains available to be examined.

Cc: barrandodger@icloud.com; Dodger Barran <barrandodger@gmail.com>
Subject: Budget

Dear Barran,

We are in the process of completing your budget for the next year.

As mentioned in my email dated the 6/10, there are changes required to your allowances to accommodate your increased rental contribution to Able Point and your requirement to pay utilises.

Effective next Monday 19th October your allowances will need to be reduced by $50 per week. You will need to advise our office on which days allowance you wish this reduction to be on.

Please see below breakdown on your income and outgoings of your pension:

Centrelink Income: $1371.27 per fortnight

Outgoings: $1369.96 per fortnight

- Rent: Able Point Rent of $500FN
- Allowance $700 FN
- Debt Repayments: $80 FN
- Origin Utility Bills: $50 FN
- Clothing allocation: $400 for the year / $15.38 FN
- Discretionary Budget: $600 for the year / $23.08
- NSWTG Management Fees: $39 for the year / $1.50FN

Net savings per fortnight: $1.31

With this budget it you have no room for additional funding outside of your allocated discretionary and clothing allocation. Please note although those amounts are stated in the budget due to your extremely limited savings of $363 before your next pension (22/10) approval of requested funds will be approved on case by case basis.

Attached is a copy of your Centrelink income statement and NSWTG account statement.

Please respond to this email with which day you wish to reduce your allowances by $50 per week.

Thank you.

Kind Regards,

Phillip
