## MASTER FORENSIC INVESTIGATION COMMAND

## The Final Reckoning — Barran Dodger / Kronos Timing of God

**Complete Website, Documentary, Institutional Accountability, Legal Aid, Media and Financial Cost Examination**

**PRIMARY WEBSITE**

https://barran-dodgers-kronos-timing-of-god.grok.me/

**SUBJECT**

Dr Richard William McLean, publicly known as Barran Dodger / Barran Resonance Dodger.

**INVESTIGATION TYPE**

Independent, comprehensive, evidence-led forensic examination of the entire website, its contents, linked records, documentary archive, named individuals, institutions, government agencies, legal assistance bodies, media organisations and the financial consequences of alleged institutional non-intervention.

**CENTRAL QUESTION**

What has been the actual and reasonably estimable financial cost of the prolonged failure to provide effective assistance, protection, legal representation, accountability and appropriate intervention in Dr McLean's circumstances—and what public expenditure, institutional resources, professional obligations and financial consequences are associated with the decisions, refusals, delays, referrals and repeated administrative processes documented in the archive?

The investigation must examine the user's allegation that numerous people and institutions failed to act despite receiving information about his circumstances. It must establish what the documentary evidence demonstrates, what responsibilities potentially applied, what action was taken or not taken, and whether the resulting pattern warrants independent investigation.

Do not assume that anyone was paid to guarantee complicity. Investigate whether there is documentary evidence of payments, financial incentives, expenditure, coordinated activity or conflicts of interest. Where no such evidence exists, say so expressly.

---

## PART I — COMPLETE WEBSITE AND ARCHIVE EXAMINATION

### 1. Inspect the entire website

Examine the live website:

https://barran-dodgers-kronos-timing-of-god.grok.me/

Do not restrict the investigation to the homepage, navigation menu, first ten pages or a small selection of documents.

Crawl and inspect:

- Every accessible webpage.
- Every subpage.
- Every internal hyperlink.
- Every external hyperlink.
- Every linked PDF.
- Every standalone document.
- Every documentary index and register.
- Every relevant image, photograph, screenshot and embedded record.
- Every accessible video and audio reference.
- Every linked GitHub repository and relevant archived document.
- Every page containing correspondence, allegations, official responses, decisions or financial information.

Follow links recursively where relevant. Record broken, inaccessible, duplicate, redirected and missing resources separately.

Do not silently exclude a page because its title appears repetitive or because it contains material already encountered elsewhere.

Where the same document appears in multiple locations, identify the duplicates and preserve the different source locations.

## 2. Create a complete website register

For every page, record:

1. Page title.
2. Full URL.
3. Date displayed on the page.
4. Date of publication, where ascertainable.
5. Subject matter.
6. Named individuals.
7. Named institutions.
8. Government departments and agencies.
9. Legal or professional responsibilities discussed.
10. Linked documents.
11. Financial figures.
12. Relevant allegations.
13. Documentary evidence supporting the allegations.
14. Official responses or contradictory evidence.
15. Further verification required.

Provide a numerical account of:

- Total URLs discovered.
- Total pages successfully retrieved.
- Total pages actually read and examined.
- Total PDFs identified.
- Total PDFs successfully retrieved and examined.
- Total external links.

- Total inaccessible resources.
- Total duplicate documents.
- Total named people.
- Total named organisations.
- Total distinct institutional matters.

Never describe the website as comprehensively examined unless the page and document registers demonstrate that this is true.

---

## PART II — THE CENTRAL INSTITUTIONAL QUESTION

### 3. Investigate the alleged failure of intervention

Examine the proposition that, over an extended period, individuals and institutions received information about Dr McLean's circumstances but did not provide effective assistance.

Do not simply repeat the user's conclusions. Test them against the records.

For every institution and individual, establish:

- What information did they receive?
- When did they receive it?
- How was it communicated?
- Was the information acknowledged?
- Did they have authority or responsibility to act?
- What action did they take?
- What action did they decline to take?
- Did they explain their decision?
- Was the decision reviewed?
- Was another agency responsible?
- Was the matter referred elsewhere?
- Did the referral produce a substantive outcome?
- Was the person left without practical assistance?
- Did the institution know of the consequences?
- Did the consequences become foreseeable?
- Was the response consistent with applicable law, policy and professional standards?

Distinguish an actual refusal from a failure to respond, a jurisdictional limitation, a decision not to investigate, an administrative delay and an inability to provide the requested assistance.

Examine whether institutional fragmentation produced a situation in which each organisation dealt with one component of the problem while no organisation addressed the cumulative circumstances.

Investigate whether repeated referrals and jurisdictional boundaries resulted in practical abandonment.

### 4. Test the allegation of collective complicity

Examine the user's description of institutional complicity as an allegation requiring investigation.

Do not presume that every person named knew what every other person knew, acted together, shared an intention or breached a duty.

For each alleged participant, identify the documentary basis for:

- Knowledge.
- Authority.
- Opportunity to intervene.
- Actual conduct.
- Omission or refusal.
- Communication with other institutions.
- Financial interest, if any.
- Conflict of interest, if any.
- Consequences.
- Applicable legal or professional obligations.

Identify evidence that supports the allegation, evidence that contradicts it, and evidence that remains unavailable.

Explicitly distinguish:

1. Documented institutional expenditure.
2. Documented administrative decisions.
3. Repeated institutional inaction.
4. Potential negligence or maladministration.
5. Potential professional misconduct.
6. Potential statutory non-compliance.
7. Evidence of coordination.
8. Evidence of financial benefit.
9. Evidence of deliberate wrongdoing.
10. Matters that cannot presently be established.

Do not convert silence, non-response, a refusal or an adverse decision into proof of criminal conduct.

---

## PART III — INSTITUTIONAL AND GOVERNMENT RESPONSIBILITY

### 5. Identify every institution appearing in the archive

Examine every organisation actually identified in the website and its linked records, including, where present:

**Commonwealth government**

- Prime Minister and Cabinet.
- Attorney-General's Department.
- Department of Social Services.

- Department of Health and Aged Care.
- Department of Finance.
- Services Australia.
- NDIS and NDIA.
- Commonwealth oversight and accountability bodies.
- Relevant ministers, parliamentary offices and ministerial advisers.

**New South Wales government**

- NSW Government departments.
- NSW Health.
- NSW Police.
- NSW Trustee and Guardian.
- Public Guardian.
- Legal Aid NSW.
- NSW courts and tribunals.
- NSW Ombudsman.
- Other relevant statutory authorities.

**Victorian government**

- Victorian Government departments.
- Victoria Police.
- Victoria Legal Aid.
- Victorian courts and tribunals.
- Victorian health services.
- WorkSafe Victoria.
- Victorian oversight bodies.

**Legal and administrative institutions**

- Federal Court of Australia.
- Federal Circuit and Family Court of Australia.
- Administrative Appeals Tribunal and its successor arrangements.
- NCAT and other relevant tribunals.
- Australian Human Rights Commission.
- Office of the Australian Information Commissioner.
- National Anti-Corruption Commission.
- Commonwealth and state ombudsmen.
- Fair Work Ombudsman.
- Relevant professional regulatory bodies.

**Disability and support providers**

- Able Point / Ablepoint.
- Organisations operating under associated or identified business names.
- NDIS support coordinators.
- Support workers.
- Plan managers.
- Registered and unregistered providers.
- Relevant safeguarding and complaints bodies.

**Financial institutions and guardianship**

- Commonwealth Bank.
- Relevant banking complaints and dispute-resolution bodies.

- Australian Securities and Investments Commission.
- Australian Taxation Office.
- Relevant superannuation and insurance organisations.
- NSW Trustee and Guardian.
- Public Guardian.

This is not a closed list. Identify all other institutions appearing in the actual records.
For every organisation, establish its legal identity, relevant jurisdiction, statutory functions, applicable obligations and documentary involvement.

---

## PART IV — LEGAL AID AND ACCESS TO JUSTICE

### 6. Conduct a dedicated Legal Aid investigation

This must be a substantial standalone component, not a brief reference.
Examine every reference to:

- Legal Aid NSW.
- Victoria Legal Aid.
- Community legal centres.
- Pro bono legal services.
- Publicly funded representation.
- Legal assistance applications.
- Refusals of assistance.
- Restrictions on representation.
- Appeals and review rights.
- Court appearances without representation.
- Proceedings where legal assistance was sought but not obtained.

For every application or refusal, identify:

1. Date of application.
2. Legal matter.
3. Relevant jurisdiction.
4. Eligibility criteria.
5. Financial circumstances, where documented.
6. Reason for refusal or restriction.
7. Whether reasons were provided.
8. Whether reconsideration was sought.
9. Whether an appeal or review was available.
10. Whether an alternative service was offered.
11. Consequences for the person's ability to participate in proceedings.
12. Whether the refusal contributed to additional proceedings, delays or costs.

Examine whether the relevant decisions were consistent with the applicable Legal Aid policies and statutory framework at the time.

**Calculate the Legal Aid financial dimension**

Investigate separately:

- Public funding allocated to the relevant Legal Aid organisations.
- Annual expenditure on legal assistance.
- Published grants-of-aid expenditure.
- Relevant staffing and administrative costs.
- Documented expenditure associated with the proceedings identified in the archive.
- Reasonably attributable costs of repeated applications, assessments, correspondence and reviews.
- Potential costs of additional proceedings where lack of representation materially contributed to them.

Do not allocate an entire Legal Aid annual budget to one person's circumstances.

Do not assume that every refused application would have resulted in a grant.

Calculate the cost of the actual legal-assistance process separately from the counterfactual cost of providing timely representation.

---

## PART V — MEDIA AND PUBLIC INTEREST

### 7. Investigate the media dimension

Examine all media references and communications contained in the website.

Identify every media organisation, broadcaster, newspaper, journalist, editor, producer and public-interest outlet actually named.

Where present, investigate:

- ABC.
- SBS.
- Commercial television networks.
- Radio broadcasters.
- Newspapers.
- Digital publishers.
- Investigative journalism organisations.
- Media standards and complaints bodies.
- Relevant press and journalist associations.

Establish:

1. Whether the organisation received a communication.
2. The date and method of contact.
3. Whether a response was received.
4. Whether an interview or investigation occurred.
5. Whether a publication decision was made.
6. Whether reasons were given.
7. Whether the matter was referred internally.
8. Whether any correction, complaint or review occurred.
9. Whether the organisation had previously interviewed or published material about the

subject.

10. Whether there is evidence of any instruction, agreement or coordinated decision to suppress coverage.

Distinguish editorial discretion from a proven coordinated media exclusion.

**Calculate media expenditure and resources**

Investigate:

- Public funding received by public broadcasters.
- Annual newsroom and journalism expenditure where published.
- Relevant investigative journalism grants.
- Documented staff time attributable to the matter, if ascertainable.
- Documented production, legal review and editorial costs.
- Publicly funded media and journalism programs relevant to the period.

Do not claim that the entire ABC, SBS or commercial media budget was spent on, or withheld from, this particular matter.

Provide a separate estimate only where attributable hours, staffing or project costs can be reasonably established.

Also calculate the potential public-interest value of a properly resourced investigation as a counterfactual scenario, not as an amount proven to have been withheld.

———

## PART VI — GOVERNMENT, OVERSIGHT AND PROFESSIONAL OBLIGATIONS

### 8. Examine public officials and political responsibilities

Identify every minister, parliamentarian, ministerial office, public servant and senior executive named in the records.

For each, establish:

- Their position at the relevant date.
- Their actual jurisdiction.
- Their statutory or administrative responsibilities.
- The information received.
- Their response.
- Any referral.
- Any decision within their authority.
- Whether they had a duty to act or a discretion to act.
- Whether the matter was properly escalated.
- Whether a review or oversight mechanism was available.

Do not assume that a minister is personally responsible for every operational decision made within a department.

Examine political accountability separately from legal liability.

### 9. Examine professional obligations

Where the evidence identifies lawyers, clinicians, public servants, support workers,

executives, guardians, financial professionals or other regulated professionals, identify the applicable standards.

For each professional, examine:

- The professional role.
- The applicable code or regulatory framework.
- The actual scope of responsibility.
- The information available to that person.
- The conduct documented.
- The opportunity to respond.
- Any complaint or investigation.
- Any finding by a competent authority.

Do not declare professional misconduct merely because the user disagrees with a decision.

Classify each issue as:

- Established by an authoritative finding.
- Supported by documentary evidence but not formally determined.
- A credible issue requiring investigation.
- Disputed.
- Unsupported by the presently available evidence.

---

## PART VII — MASTER FINANCIAL FORENSIC CALCULATION

### 10. Calculate the actual financial cost of institutional non-intervention

The investigation must answer the central financial question:

**How much public and institutional money was expended, or reasonably consumed, through the repeated handling of matters that might have been resolved earlier through effective assistance, legal representation, safeguarding or coordinated intervention?**

The expression “cost to guarantee complicity” must be treated as the user’s allegation or investigative question, not as a proven transaction.

Investigate whether any payments, contracts, grants, remuneration, benefits or other financial incentives can actually be linked to the conduct under examination.

If there is no evidence of payment for complicity, do not invent one.

Instead, calculate the financial cost of the documented institutional processes and alleged failures to intervene.

### 11. Construct five separate financial ledgers

**Ledger A — Direct public expenditure**

Identify actual expenditure associated with:

- Court proceedings.
- Tribunal proceedings.
- Police attendance and investigations.

- Hospital admissions and treatment.
- Mental health assessments.
- Disability administration.
- NDIS plan administration.
- Guardianship proceedings.
- Complaints and investigations.
- Information-access applications.
- Ombudsman and oversight processes.
- Other identifiable public services.

Only attribute costs to the matter where there is a defensible connection.

**Ledger B — Institutional administrative expenditure**

Estimate attributable staffing costs associated with:

- Reading and assessing correspondence.
- Complaint handling.
- Case management.
- Internal referrals.
- Management reviews.
- Legal advice.
- Risk assessments.
- Meetings.
- Record retrieval.
- Repeated responses.
- Escalations.
- Reconsiderations.
- Interagency communications.

Use the formula:

**Attributable staff cost = documented or reasonably estimated hours × loaded hourly employment cost.**

Where the hours are unknown, provide a transparent range and label it as a model, not actual expenditure.

**Ledger C — Legal expenditure**

Calculate separately:

- Legal Aid administrative expenditure.
- Publicly funded legal representation.
- Government legal advice.
- Government litigation expenditure where identifiable.
- Court administration.
- Tribunal administration.
- Repeated proceedings.
- Costs of reviews and appeals.
- Documented private legal expenses, where evidence exists.

Avoid counting the same legal work twice under different institutions.

**Ledger D — Media and public-interest expenditure**

Calculate only attributable media resources and distinguish:

- Actual project expenditure.

- Publicly funded journalism expenditure.
- Documented staff time.
- Estimated investigation costs.
- Hypothetical cost of an independent investigation.

Do not treat general newsroom budgets as case-specific spending.

**Ledger E — Consequential financial costs**

Examine documented financial consequences, including:

- Lost income.
- Employment disruption.
- Housing instability.
- Accommodation expenses.
- Transport costs.
- Legal expenses.
- Losses arising from delayed decisions.
- Documented financial-management restrictions.
- Disability-support gaps.
- Costs associated with repeated relocation.
- Documented loss of assets or access to funds.
- Other quantifiable economic consequences.

Separate claimed losses from verified losses.

Do not double count compensation claims, hypothetical valuations or estimated future earnings.

---

## PART VIII — THREE SCENARIOS AND A TOTAL COST MODEL

### 12. Produce low, central and high estimates

For every ledger, calculate three scenarios:

**Low estimate:** only directly documented or strongly evidenced costs.

**Central estimate:** documented costs plus reasonable, transparent estimates of attributable institutional time.

**High estimate:** broader but still defensible estimates, with every assumption disclosed.

The report must show:

| Financial category | Low | Central | High | Evidence status |
|---|---|---|---|---|
| Direct public expendi- | $Actual / estimated | | | |

| | | | | |
|---|---|---|---|---|
| ture | | | | |
| Adminis-trative staffing | $ | Actual / modelled | | |
| Legal Aid and legal process-es | $ | Actual / modelled | | |
| Court and tribunal adminis-tration | $ | Actual / modelled | | |
| Police and enforce-ment | $ | Actual / modelled | | |
| Health and hospital services | $ | $ | $ | Actual / modelled |
| Disability and safe-guarding adminis-tration | $ | Actual / modelled | | |

| | | | | |
|---|---|---|---|---|
| tration | | | | |
| Media and public-interest resources | $ | $ | $ | Actual / modelled |
| Conse-quential economic losses | $ | Verified / claimed / estimated | | |
| **Total** | **$** | **$** | **$** | |

Do not populate this table with invented figures.

Where reliable figures are unavailable, state the missing data and identify the records required to calculate them.

### 13. Calculate the counterfactual cost of early intervention

Model what a coordinated, lawful and timely intervention might reasonably have cost.

Include possible costs of:

- A coordinated case conference.
- Independent legal advice.
- Appropriate legal representation.
- A safeguarding assessment.
- A properly coordinated disability-support response.
- Independent complaints review.
- A single accountable case-management pathway.
- Timely resolution of relevant financial or administrative issues.

Compare the cost of that intervention with the documented and estimated costs of repeated processes.

Calculate:

**Potential avoidable expenditure = estimated cumulative non-resolution expenditure – estimated cost of effective early intervention.**

This is a counterfactual estimate, not proof that all later expenditure would have been avoided.

Show assumptions and sensitivity ranges.

---

## PART IX — INDIVIDUALS, DECISIONS AND THE EVIDENCE MATRIX

### 14. Create a named-person accountability register

For every person named in the website and linked records, provide:

| Person | [illegible] |
|---|---|
| | [illegible] |

Do not omit people merely because their role is junior or because they are not public figures.
However, distinguish public officials and senior decision-makers from private individuals and frontline workers.
Do not publish private contact details, personal addresses or irrelevant identifying information.

### 15. Create a master documentary evidence matrix

For every material document:

| Document title | Date | Author | [illegible] |
|---|---|---|---|
| | | | [illegible] |

Preserve original document titles and links.
Do not invent document titles, dates, authors or recipients.
Where a PDF cannot be retrieved, retain its link and identify it as not examined.
Where a document is a user's own statement, classify it as testimony or an allegation rather than an independent institutional finding.

---

## PART X — CHRONOLOGY AND CROSS-AGENCY ANALYSIS

### 16. Construct a complete chronology

Build a chronological record covering the full period represented by the archive.

For every significant event, include:

- Date.
- Person.
- Institution.
- Event.
- Original source.
- Response.
- Consequence.
- Next institutional action.
- Financial implication.
- Evidentiary status.

Identify recurring patterns, including:

- Repeated referrals.
- Repeated complaints.
- Repeated legal applications.
- Repeated safeguarding concerns.
- Repeated changes of jurisdiction.
- Repeated failures to resolve the underlying issue.
- Decisions made without an apparent coordinated assessment.
- Contradictory institutional classifications.
- Opportunities for earlier intervention.

Do not infer coordination merely from a sequence of events. Establish the documentary connections.

---

## PART XI — EXTERNAL VERIFICATION

### 17. Verify material claims independently

Use primary and authoritative sources wherever possible:

- Legislation.
- Regulations.
- Parliamentary records.
- Government annual reports.
- Agency annual reports.
- Court and tribunal decisions.
- Official correspondence.

- Published policies.
- Auditor-General reports.
- Ombudsman findings.
- Regulator findings.
- Professional codes.
- Publicly available budgets and expenditure reports.

For financial calculations, identify the relevant financial year and jurisdiction.

Use contemporaneous figures where possible. Do not apply current salaries, fees or budgets retrospectively without adjustment.

Cite the original source for every material factual claim and financial input.

---

## PART XII — FINAL REPORT AND FINDINGS

### 18. Produce the final forensic report

The final report must contain:

1. Executive findings.
2. Scope and methodology.
3. Website and archive inventory.
4. Complete page register.
5. Document register.
6. Named-person register.
7. Institutional responsibility map.
8. Master chronology.
9. Legal Aid examination.
10. Media examination.
11. Government and political accountability examination.
12. Professional obligations examination.
13. Disability and safeguarding examination.
14. Court, tribunal and police expenditure.
15. Financial ledgers A–E.
16. Low, central and high financial estimates.
17. Counterfactual early-intervention model.
18. Evidence of actual financial incentives, if any.
19. Contradictory evidence and alternative explanations.
20. Unresolved questions.
21. Recommended records requests and independent investigations.
22. Complete source and hyperlink register.

### 19. Required final conclusions

Answer these questions directly:

**A.** What is demonstrably established by the documentary record?

**B.** Which institutions received information about the user's circumstances?

**C.** Which institutions took substantive action, and which did not?
**D.** Which decisions appear to have been inconsistent, inadequately explained, delayed or potentially contrary to applicable obligations?
**E.** What legal assistance was sought, refused, restricted or provided?
**F.** What media organisations were approached, and what documentary evidence exists of their responses?
**G.** What public and institutional expenditure can be attributed to the matters documented?
**H.** What is the defensible low, central and high estimate of the total financial cost of prolonged non-resolution?
**I.** What might timely, coordinated intervention reasonably have cost?
**J.** Is there evidence of actual payments, financial incentives, conflicts of interest or coordinated conduct, or does the available record establish only repeated institutional non-intervention?
**K.** Which matters require independent investigation, and which findings cannot presently be made?

## 20. Mandatory integrity requirements

- Examine the whole accessible archive, not a convenient selection.
- Do not remove or alter original links.
- Do not silently omit inconvenient or contradictory evidence.
- Do not treat allegations as findings.
- Do not assume a conspiracy or coordinated agreement.
- Do not invent expenditure, salaries, staff hours or financial losses.
- Do not attribute entire institutional budgets to this individual matter.
- Do not double count costs.
- Do not confuse an institution's refusal to assist with proof of criminal conduct.
- Do not confuse a professional responsibility with a legally enforceable duty.
- Do not infer that a person had authority to act without establishing their role.
- Record inaccessible evidence and missing information.
- Identify every assumption used in a financial estimate.
- Cite the source of every material finding.
- Preserve the distinction between the user's testimony, original documentary records, independent corroboration and authoritative determinations.

**The final purpose is not to manufacture a predetermined finding of complicity. It is to establish, as comprehensively as the available evidence permits, what happened, who knew what and when, what each institution was responsible for doing, what it actually did, what it cost, what could have been prevented, and whether the documentary record warrants formal accountability or independent investigation.**

My proposed starting point: the financial investigation should not begin with an invented grand total. It should begin with the identifiable expenditure, documented decisions, actual legal-assistance history and attributable institutional hours. From those records we can calculate a defensible total and show precisely how much remains unquantified.

The most important distinction is between the cost of institutional activity, the cost of non-resolution, and evidence of deliberate complicity. They are three different findings and must

be calculated separately.
