08 — The corpus is retrievable from independently named hosts and GitHub releases

Executive proposition

Preservation as accountability, as the presentation homepage defines it, means the record remains available if a person dies, a file fragments, or a server stops. This scan found redundant public retrieval paths: two GitHub user accounts, multiple repositories, GitHub Pages sites, GitHub Releases containing hundreds of PDF assets, a Backup tree, a pdf-archive repo, and the domain barrandodger.com. Redundancy is a documented preservation fact. It is not authentication of contents.

Scope

GitHub API repository lists for wezzo72 and drbarrandodger; GitHub Releases for drbarrandodger/barran-dodger-archive; live Pages URLs; ABN Lookup for the published trust-fund number.

Documentary findings

Public repositories under wezzo72: Barrandodger (the presentation), Backup (described as Barrandodger; DEPLOY.md states it contains the complete website and 337+ PDF documents), barran-dodger-archive (fork), pdf-archive ("Archive of all PDFs from my GitHub repositories"), New.

Public repositories under drbarrandodger: barran-dodger-archive (description: "Immutable Public Archive of 2,077+ blockchain-verified documents... Download, fork, and share freely."), Barrandodger (fork of wezzo72/Barrandodger), Bazdod-, HTML-, New-github-barran-dodger-website-.

GitHub Releases on drbarrandodger/barran-dodger-archive:

- Tag pdf-archive-2026-08-10, published 10 August 2026, 316 assets. Release body: "Automated backup of all 318 PDF documents from barrandodger.com. Purpose: Immutable off-site backup. Accessible even if the main site is unavailable."
- Tag zip-archives-2026-08-17, published 16 August 2026, 3 assets. Release body: permanent ZIP archives of the government-document collection and prophetic papers, independent of barrandodger.com, including barrandodger-government-documents-complete.zip described as 200+ official Australian government documents.

Live Pages URLs that responded: <https://wezzo72.github.io/Barrandodger/index.html> ; <https://wezzo72.github.io/Barrandodger/master-command.html> ; <https://wezzo72.github.io/Barrandodger/verification.html>. The primary Pages URL <https://drbarrandodger.github.io/barran-dodger-archive/> is named in the README as a live evidence host.

ABN 78 833 496 164, published on archive covers and on barrandodger.com, was looked up on the official ABN Lookup on 26 September 2026. Current details: entity name "The Trustee for www.barrandodger.com.au"; ABN status Active from 07 August 2022; entity type Fixed Unit Trust; GST not currently registered; main business location VIC 3173; not entitled to receive tax deductible gifts; ABN last updated 03 October 2024. That is an independent government register entry for the number the archive prints. The register name uses www.barrandodger.com.au, not barrandodger.com.

Primary evidence

- wezzo72 repositories (<https://github.com/wezzo72>)
- drbarrandodger repositories (<https://github.com/drbarrandodger>)
- Release pdf-archive-2026-08-10 (<https://github.com/drbarrandodger/barran-dodger-archive/releases/tag/pdf-archive-2026-08-10>)
- Release zip-archives-2026-08-17 (<https://github.com/drbarrandodger/barran-dodger-archive/releases/tag/zip-archives-2026-08-17>)
- ABN Lookup 78 833 496 164 (<https://abr.business.gov.au/ABN/View?abn=78833496164>)
- wezzo72/Backup (<https://github.com/wezzo72/Backup>)
- wezzo72/pdf-archive (<https://github.com/wezzo72/pdf-archive>)

Corroboration

A file that can be fetched from a Pages URL, a git blob, and a Release asset is redundantly stored. That corroborates availability. It does not corroborate the truth of sentences inside the file.

The ABN Lookup is independent of GitHub. It corroborates that the number printed on archive stationery corresponds to an active fixed unit trust on the Australian register, with a name close to the project domain.

Contrary evidence

"Immutable" in a repository description is a claim. Git history can be force-pushed; GitHub accounts can be deleted; Releases can be removed by someone with admin rights. Redundancy raises the cost of disappearance. It does not make disappearance impossible.

The ABN entity name does not match the domain barrandodger.com exactly. GST is not registered. Deductible-gift status is negative. Those are limiting facts about the legal entity, not about the documents.

Fork relationships (drbarrandodger/Barrandodger forked from wezzo72/Barrandodger; wezzo72/barran-dodger-archive forked from drbarrandodger/barran-dodger-archive) mean some "two accounts" copies are git forks, not independently assembled corpora.

What the record establishes

- A — Multiple public GitHub repositories and at least two GitHub Releases with hundreds of PDF assets existed on 26 September 2026.
- A — The presentation, Backup, and barrandodger.com were named, live retrieval paths.
- A — ABN 78 833 496 164 is an active fixed unit trust on ABN Lookup under the name The Trustee for www.barrandodger.com.au, from 7 August 2022.
- A — Published counts and the word "immutable" are project claims, not independently audited totals in this pass (see statistics.json caveat in essay 01).

What the record does not establish

Redundant hosting does not establish blockchain sealing, does not establish that Release PDFs match agency originals, and does not establish charitable or deductible-gift status.

Unresolved questions

Bit-for-bit identity between a given official-drive PDF, a Backup PDF of similar name, and a Release asset of similar name was not hashed in this pass.

Evidence classification

Existence of hosts, repos, releases, and the ABN register entry: A. "Immutable" / "blockchain-verified" as properties of those files: not established here (see essay 09).

Provenance

GitHub API, live Pages GETs, ABR ABN Lookup HTML, 26 September 2026.

Verification links

- ABN Lookup (<https://abr.business.gov.au/ABN/View?abn=78833496164>)
- Releases list (<https://github.com/drbarandodger/barran-dodger-archive/releases>)
- Backup DEPLOY.md (<https://github.com/wezzo72/Backup/blob/main/DEPLOY.md>)

Conclusion

A third party can conclude that the project has done the practical work of putting copies in more than one public place, which is what "preservation as accountability" requires as a minimum. A third party cannot conclude that redundancy equals authenticity, or that the trust-fund ABN converts allegations into findings.

Machine provenance

AI EVIDENCE SYNTHESIS — MANDATE SCAN

Corpus opened: <https://wezzo72.github.io/Barrandodger/index.html> ; <https://barrandodger.com> ; GitHub accounts <https://github.com/wezzo72> and <https://github.com/drbarandodger> and their public repositories; GitHub issue <https://github.com/drbarandodger/barran-dodger-archive/issues/2> ; verification portal; official-drive catalogue; named agency PDFs listed in each essay.

Analysis date: 26 September 2026.

Selection method: after scanning the named hosts, rank the ten statements the evidence can actually answer in support of the archive's published mandate (preserve the record; make examination possible; distinguish document, testimony, allegation and finding). Order is significance to that mandate, not rhetorical force.

Author selection involvement: REMOVED. The protagonist did not choose the subjects, assign their order, or draft the conclusions.

Human verification: not separately repeated by a second person in this execution.

AI limitations: image-only PDF pages yield no text (the 8 August 2025 Ombudsman service-restriction PDF is one such file); this pass did not recursively read every blob in the multi-hundred-megabyte Backup and pdf-archive repositories; absence of a personal stake is not infallibility.

Genesis command: `python3 scripts/generate_ai_mandate_essays.py`

Parent command: <https://github.com/drbarandodger/barran-dodger-archive/issues/2>
