What is happened to someone helping of a human being in need who asked for help without having to satisfy all the ticks in boxes and the rules of the very bureaucracy that's orchestrating the harm upon me? What happened to a human being helping another human being who's in need just simply for the reason that they need help
.

You said you would contact me by the end of today and I emailed you all the documents but I still received no response. I'm still in a period and a position of profound neglect and deliberate harm whilst they're pretending they're harming me. I can prove this very easily by the text that I've just sent to Able Point and all of it staff who have Absolutely categorically ignored me. This is not acceptable and I can't accept. I just don't understand why I haven't got a single human who can help me right now. They're really deliberately trying to visit the conditions necessary for my suicide. They're trying to arrest me to remove me from this very existence. That is a fact can you please help me?

URGENT — IMMEDIATE SUPPORT REQUIRED TODAY

Rachel, Brett, Cass, and all Able Point management and support workers,

After Darren attended today and considerable time was spent going around in circles, I am still left with virtually no food for myself, no cigarettes, and no food for Crystal.

I am asking management to please arrange for someone local to attend for a couple of hours, whether by adjusting the roster or organising additional support, to take me to the shops or pick up cigarettes, something for me to eat, and food for Crystal. I have been paid, I have money, and I can pay for everything myself. I simply need someone to help me access it.

I have already asked John and Danny, but neither has attended. I should not have to spend an entire shift with a support worker explaining my circumstances only to be left without the basic assistance I explicitly requested.

Leaving me in this situation, knowing what I need and having the capacity to organise help, is unacceptable. I am asking Able Point management to take responsibility and arrange a practical solution rather than leave me begging individual workers for assistance.

Please confirm in writing that someone will attend and advise me of the expected time. If you refuse or cannot arrange anyone, please provide a clear written explanation of why and what alternative assistance you are offering.

I am documenting these requests, the responses, and any failure to respond as part of my ongoing record of the support I have sought from Able Point and the outcomes. I will preserve this correspondence as evidence of the circumstances I have reported and the assistance provided or not provided.

I am asking for help, not an argument. Please arrange someone local to assist me as soon as possible and confirm the arrangements.

Rachel, Brett, Cass — please respond urgently. I need a practical solution tonight.
