

Based on the documents you've provided, here's a comprehensive response summarizing and contextualizing their significance within your public interest disclosure (PID) efforts:

Subject: Summary and Significance of Documents Related to PID Submissions by Dr. Rich McLean

Dear [Recipient/Agency],

This communication provides an overview of key documents submitted by Dr. Rich McLean in support of his public interest disclosures under the Public Interest Disclosure Act 2013 (Cth). The documents collectively establish a prolonged pattern of alleged systemic misconduct, abuse, and institutional neglect, and outline the legal and personal basis for Dr. McLean's whistleblower status.

1.

RE PID from Rich McLean – “Act Now to Avoid My Likely Death”

This document is a direct plea from Dr. McLean dated August 2022 to the Department of the Prime Minister and Cabinet (PM&C). It details his urgent call for help due to systemic oppression, health neglect, and threats to his life. He explicitly outlines fears of wrongful incarceration, institutional abuse, and harm within public psychiatric settings. This submission is significant as it initiates the timeline of whistleblower engagement under the PID framework, backed by severe allegations of human rights breaches.

2.

PID2023 Krypton – Preliminary Inquiries (NDIA)

This correspondence from NDIA (April-May 2023) addresses PID submissions from Dr. McLean and requests clarification of his public official status and the specific disclosable conduct being alleged. It reflects a formal step in the PID process under Section 26 of the Act, acknowledging the potential eligibility of the disclosures and requesting supporting details to proceed with assessment or allocation.

3.

Notice of Decision – PM&C Rejection of PID

This official decision from PM&C (August 2022) rejects Dr. McLean's PID on the basis that it did not meet the criteria for an "internal disclosure" under the Act. PM&C asserted that the disclosure did not relate to their agency and that Dr. McLean did not qualify as a public official under their interpretation. This document is pivotal as it reflects institutional reluctance to investigate despite the gravity of the allegations.

4.

Commonwealth Ombudsman – Rejection of PID Disclosure

In November 2021, the Commonwealth Ombudsman similarly refused to pursue Dr. McLean's PID claims,

stating they did not meet the threshold required under the Act. This decision occurred despite extensive allegations of misconduct by health institutions, ASIO, and other government actors. The document includes grave accusations including conspiracy, financial abuse, cover-ups, and systemic discrimination, showing the breadth of issues raised.

5.

**22 October 2021 – Mass Email: Evidence RE
EN2112857**

This communication was sent to multiple regulatory and legal authorities and outlines Dr. McLean's whistleblower intentions, legal standing as a government-contracted professional, and plea for guidance on the proper procedural steps. It underscores his attempts to assert his identity as a public official and to gain recognition under the PID Act.

6.

19 March 2023 – Evidence for Disclosable Conduct

A comprehensive document presenting direct and circumstantial evidence of alleged disclosable conduct. This includes confessions of Centrelink fraud under coercion, systemic denial of entitlements, and a range of severe claims about public official misconduct. This document is key to understanding the full extent of the grievances and their alignment with PID criteria such as corruption, maladministration, and abuse of public trust.

7.

3 November 2021 – Follow-up Email to 35 Agencies

This emotional follow-up details the desperation and institutional neglect experienced by Dr. McLean, reinforcing his claims of being systematically ignored. It acts as a record of widespread inaction and institutional apathy toward his earlier disclosures and reinforces the psychological and existential impact of prolonged whistleblower suppression.

8.

Melbourne Health PID Classification

This formal classification document supports Dr. McLean's status as a public official. It confirms past employment at Melbourne Health and his contract with the NDIS, thereby validating eligibility under PID legislation. It reinforces the legal basis of his whistleblower status and eligibility to lodge disclosures.

Conclusion:

These documents demonstrate a sustained, multi-year effort by Dr. McLean to engage with proper channels to report alleged systemic misconduct, only to be met with administrative deflection, refusals to allocate, or non-responses. Collectively, they represent a serious case of potential systemic victimisation, institutional accountability failures, and the personal costs borne by an individual attempting to act in the public interest.

We respectfully urge a comprehensive review and reconsideration of these materials in light of the severity and documented persistence of the issues raised.

Sincerely,

[Your Name / Title]
